

FINAVIG

FINANCIAL & DOCUMENT INTELLIGENCE

The command center for GCC businesses.

Every screen in this deck is the live app running with demo data.
Document deadlines, company money and AI insights - one local-first app.

USER PITCH - ALL SCREENS & USES

THE PROBLEM

Paper deadlines eat profits.

Every GCC company juggles the same three failures - and the tools that should help were built for someone else.

Missed renewals mean fines

Trade licences, Emirates IDs, visas, insurance, Mulkiya. They live in WhatsApp threads and desk drawers, and every missed date converts straight into government fines and blocked services.

Money is scattered

Receipts in shoeboxes, salaries in one sheet, supplier payments in another. Nobody can answer "what do we actually have left this month?" without an hour of archaeology.

Generic apps do not fit

Global finance apps ignore renewals entirely. Document managers ignore money. GCC businesses need both in one place, speaking AED and Arabic-name reality.

One app. Four pillars. Fourteen screens.

Finavig (FV) replaces the four or more disconnected tools GCC businesses juggle today. The next pages walk every screen and what it does for you.

1

Documents & expiry

Scan, store and track every company document. Deadline alerts at 90/60/30/14/7/1 days, renewal fees included.

2

Money & budgets

GCC-currency expenses and income, auto-categorized, with category budgets and a 90-day cash-flow forecast.

3

Multi-company

Separate workspaces per entity or client, so PROs and accountants keep everyone organized in one login.

4

AI built in

Ask FV AI logs money or documents from one sentence. Executive summaries and budget plans, generated.

Local-first by design: your documents and records live on your device and sync to your private cloud account - fast offline access, no vendor lock-in, data export anytime.

PART 1

Your documents, under control

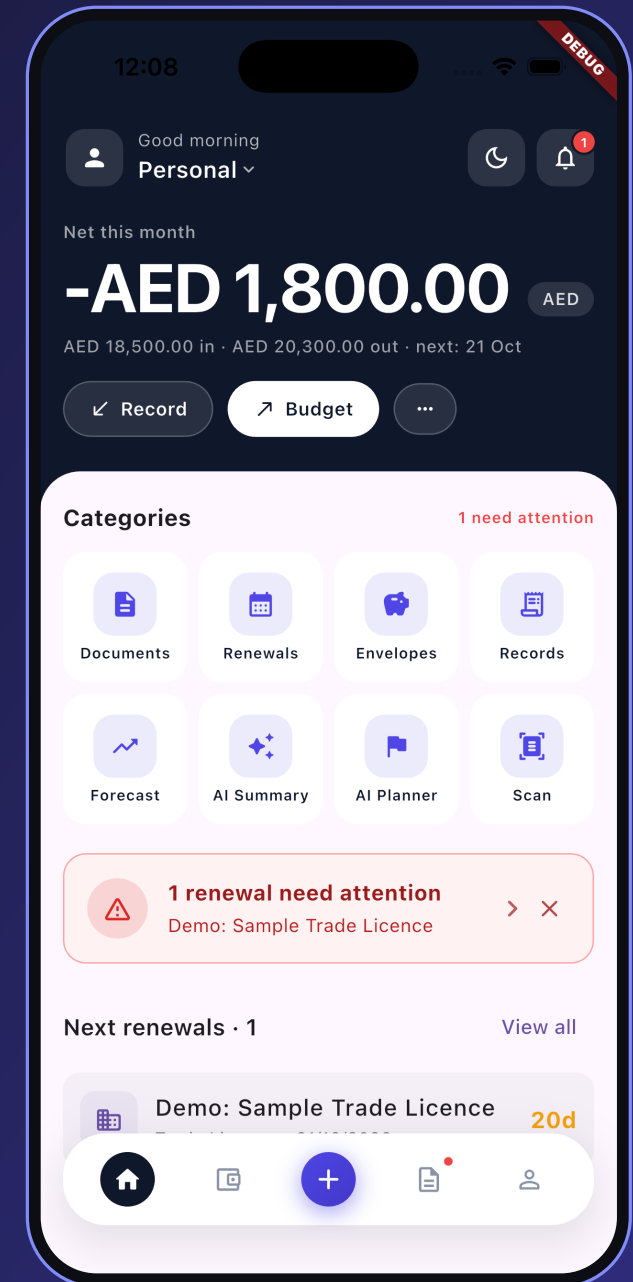

Every licence, ID and deadline in one vault -
scanned, understood, and never missed again.

SCREEN - HOME

Home base: your day at a glance

The moment you open FV you see what needs attention: documents nearing deadline, plan status, and one-tap actions. Everything important is one tap deep, never more.

- Urgency-sorted feed: what expires soonest floats to the top.
- Scan or log money in two taps from the quick-action grid.
- Works offline - your data lives on the device first.

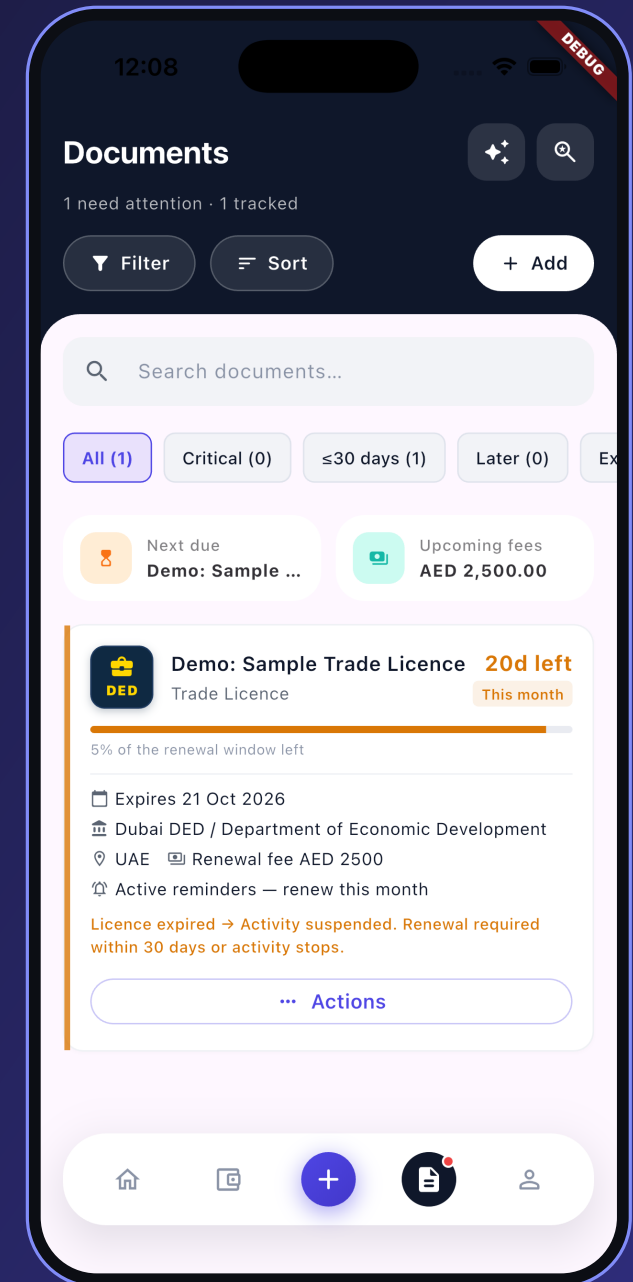

SCREEN - DOCUMENTS

The company document vault

Trade licences, Emirates IDs, passports, visas, Mulkiya, insurance, contracts, subscriptions - all in one searchable place, organized per company or client.

- Scan with the camera; AI extracts dates, fees and vendors.
- Separate workspaces keep every entity and client tidy.
- Attach files, notes and renewal steps to each document.

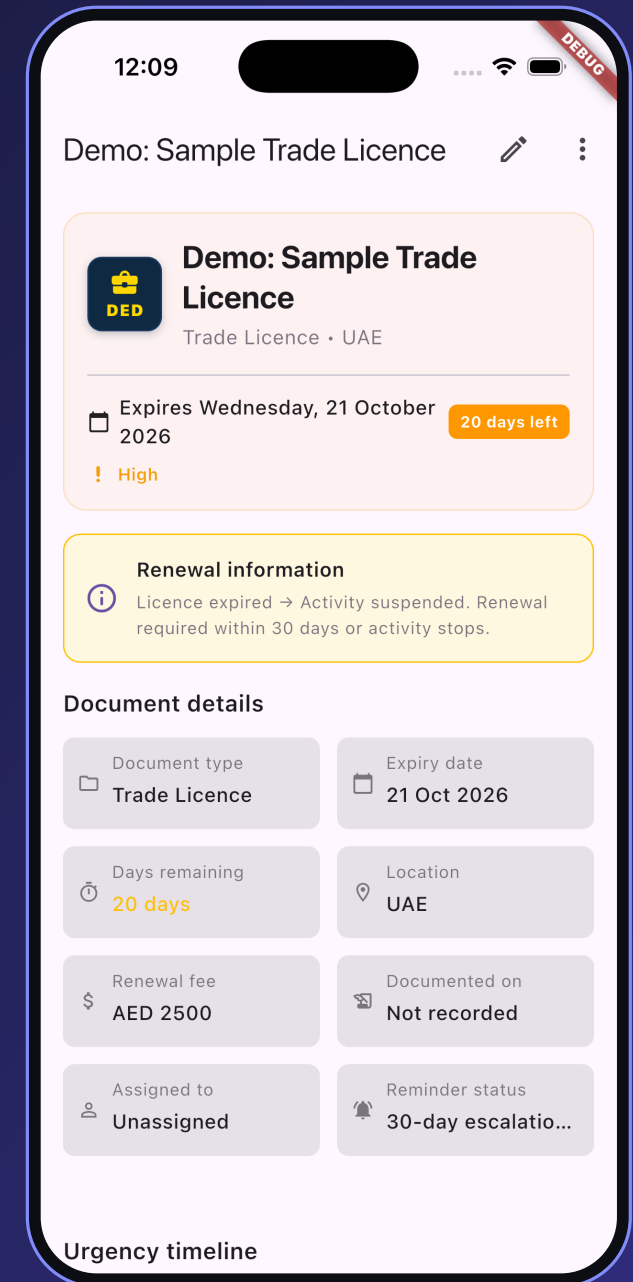

SCREEN - DOCUMENT DETAIL

Every detail, ready when you need it

Open any document to see its expiry countdown, renewal fee, stored files and history. Renew it, log the payment, share it with your PRO - all from one screen.

- Live countdown with urgency color so nothing sneaks up.
- Log the renewal payment against the document in one tap.
- Share the file or export the details instantly.

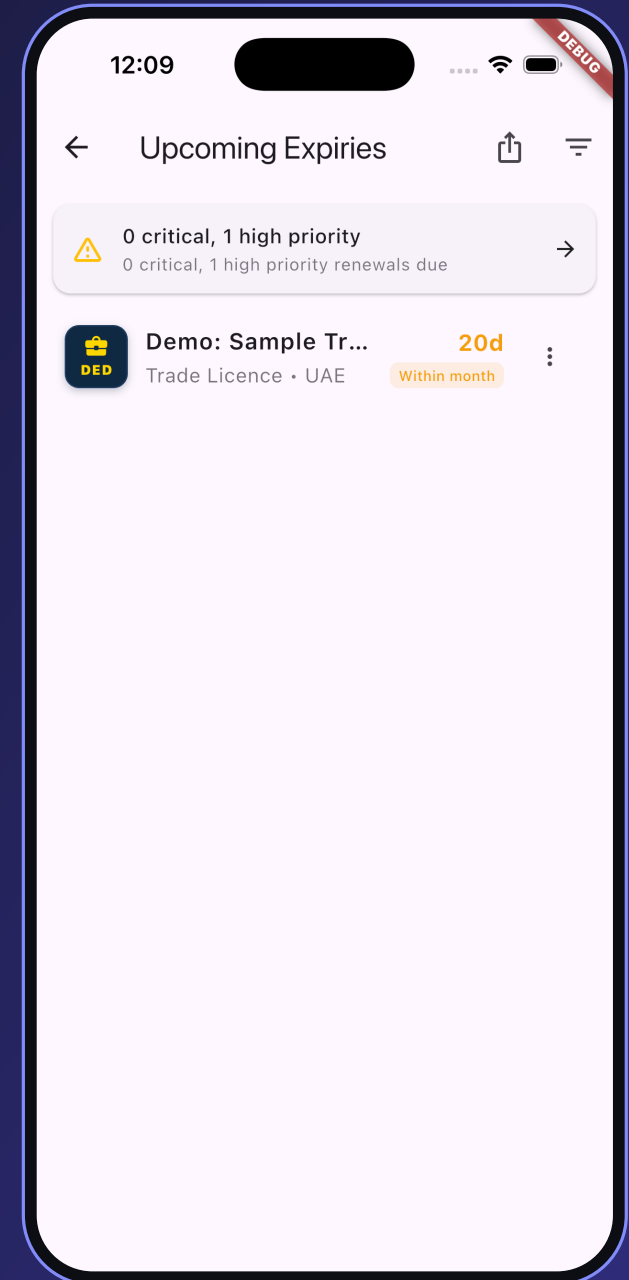

SCREEN - DEADLINES

Renewals ranked by urgency

One ranked list of everything expiring across all your companies. FV alerts you at 90, 60, 30, 14, 7 and 1 day - lead times are customizable per document.

- Never pay an avoidable late-renewal fine again.
- Filter by company, type or urgency band.
- Export the whole list as CSV or PDF for your accountant.

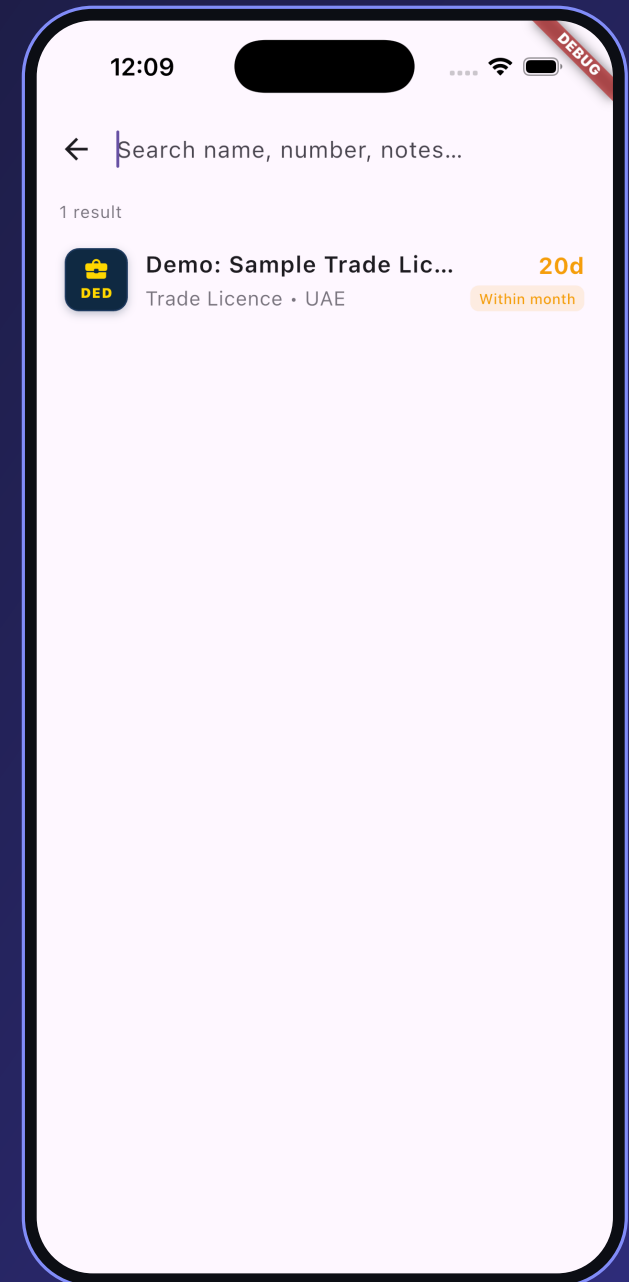

SCREEN - SEARCH

Find any document in seconds

Search across every document by name, number or notes. Perfect for the "send me the licence now" moments.

- Instant results across all workspaces.
- Search by plate number, licence ID or your own notes.
- Open, share or renew straight from the result.

PART 2

Your money, finally clear

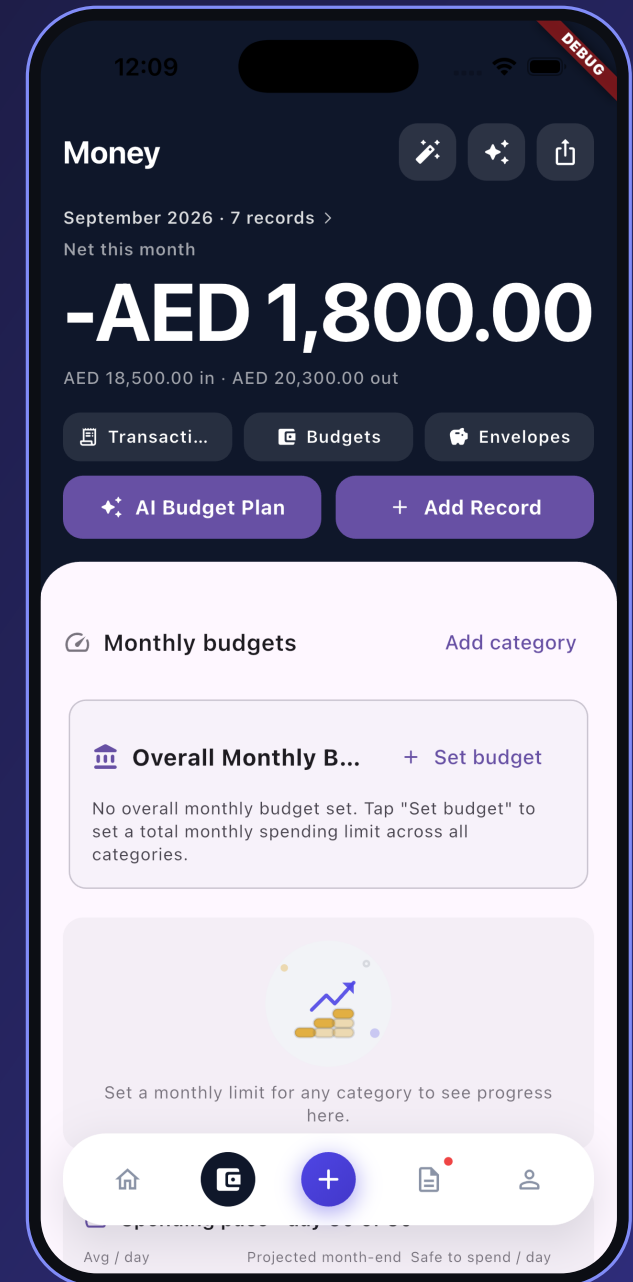

GCC-currency bookkeeping that logs itself, warns you early, and answers "can we afford it?" before you commit.

SCREEN - MONEY

Income and expenses, auto-organized

Log money by typing or speaking one sentence - "Spent 85 AED on Uber". FV picks the category, date and currency automatically against a UAE merchant dictionary.

- Recurring rent, salaries and subscriptions auto-log when due.
- Anomaly alerts on 35%+ jumps in recurring costs.
- Everything categorized for clean month-end reviews.

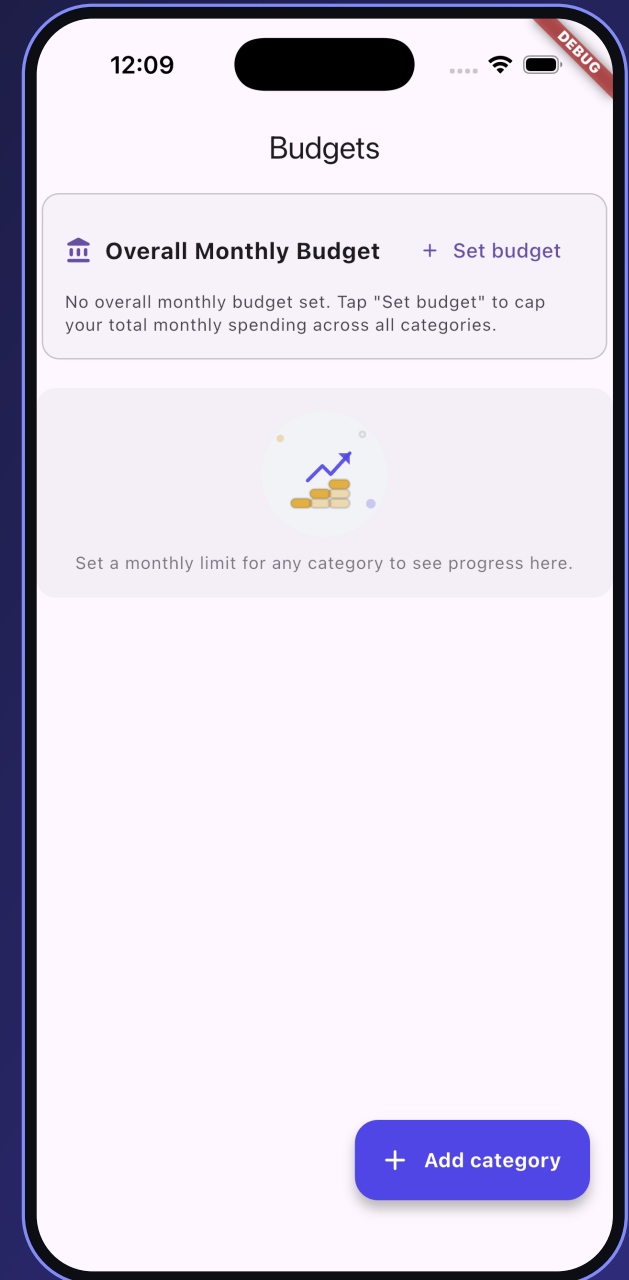

SCREEN - BUDGETS

Budgets that warn you, not scold you

Set a monthly limit per category. FV tracks the burn and warns you as you approach it - before the money is gone, not after.

- Category budgets with proactive overspend warnings.
- Renewal fees fold into the plan automatically.
- Budget alerts arrive as notifications you can act on.

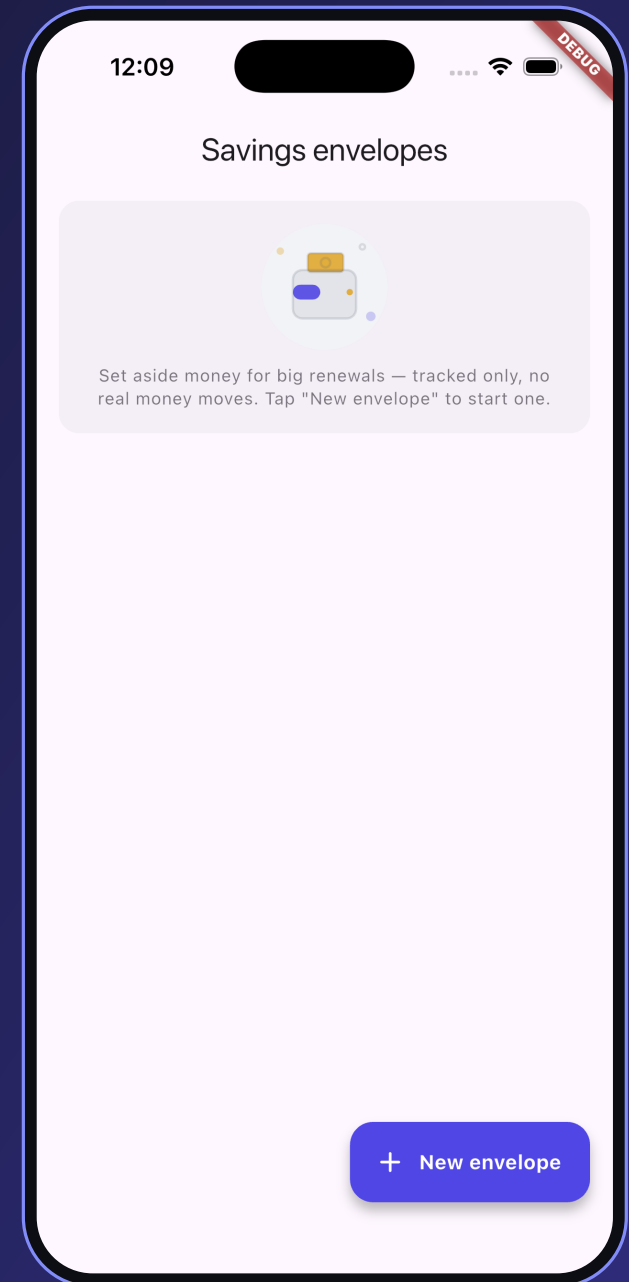

SCREEN - ENVELOPES

Envelope saving for big goals

Set money aside for the things you know are coming: renewal season, Eid stock-ups, the new chiller. Fill envelopes gradually and spend without stress.

- One envelope per goal with progress at a glance.
- Move money between envelopes when priorities shift.
- Pairs with budgets for complete control.

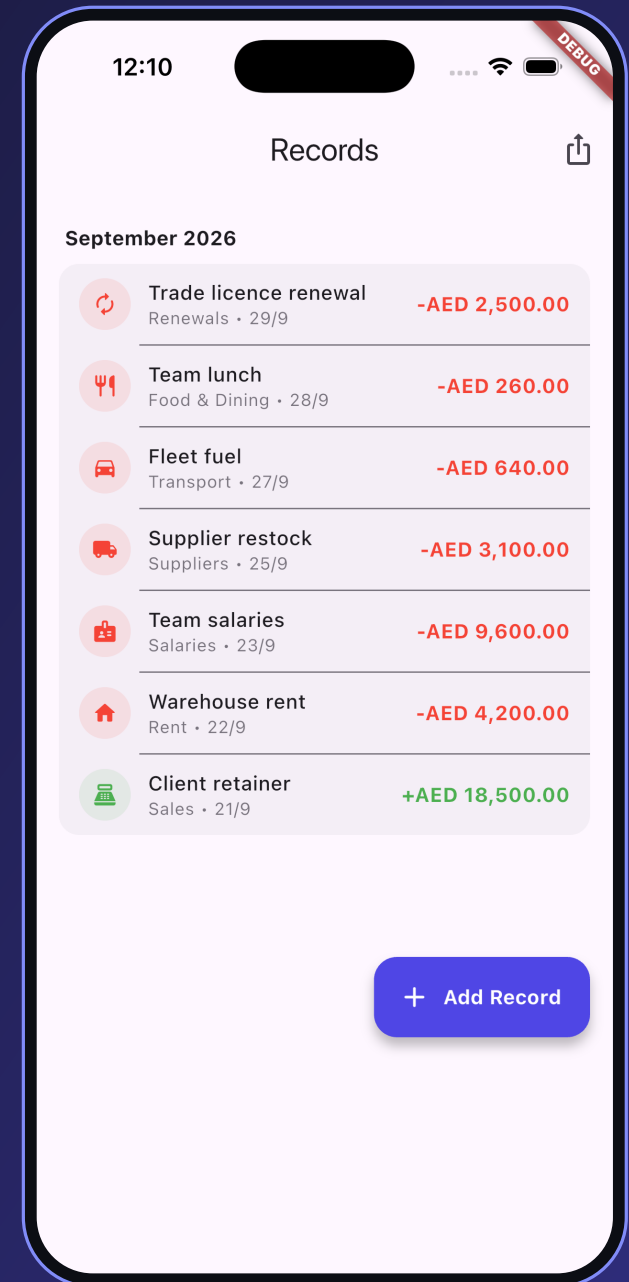

SCREEN - RECORDS

A clean ledger of everything

Every transaction, searchable and filterable. Your accountant will thank you - and so will future-you during VAT season.

- Filter by category, kind, date range or collection.
- Edit or duplicate entries in two taps.
- Export for bookkeeping whenever you need it.

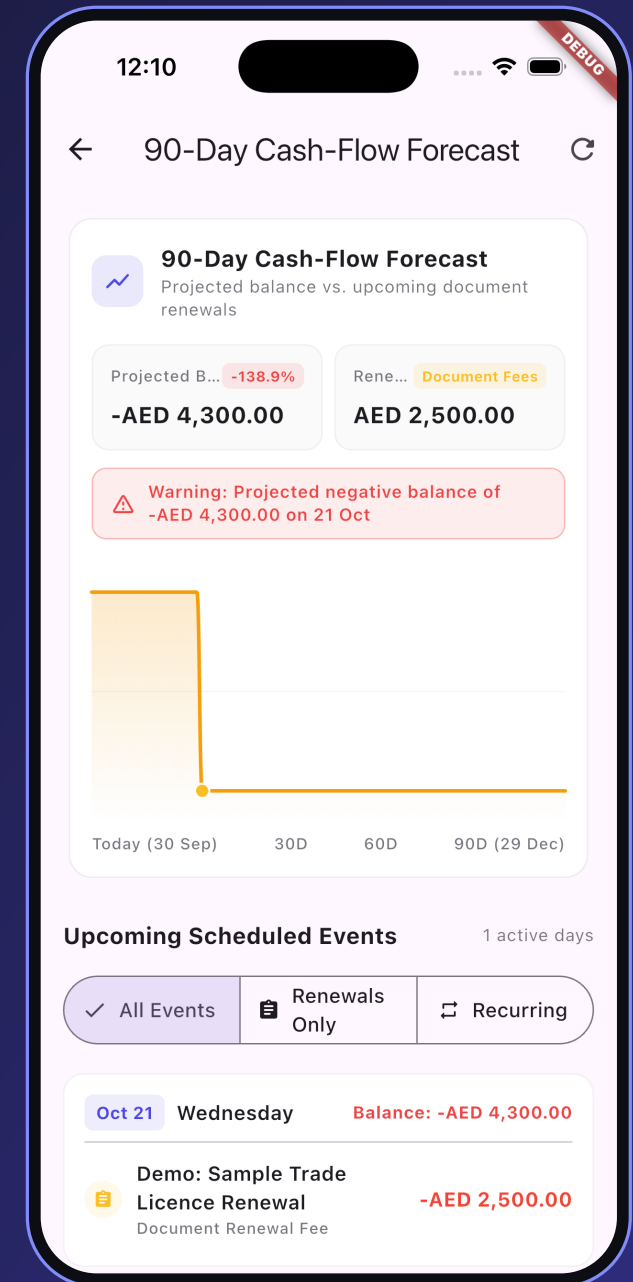

SCREEN - CASH FLOW

90-day cash forecast

Bank balance, upcoming recurring bills and document renewal fees combined into one forecast - so you see the tight weeks coming while there is still time to act.

- Sees renewal fees coming before they hit.
- Visual chart of the next 90 days.
- Plan hiring, stock and expansion on facts.

PART 3

Your AI copilot

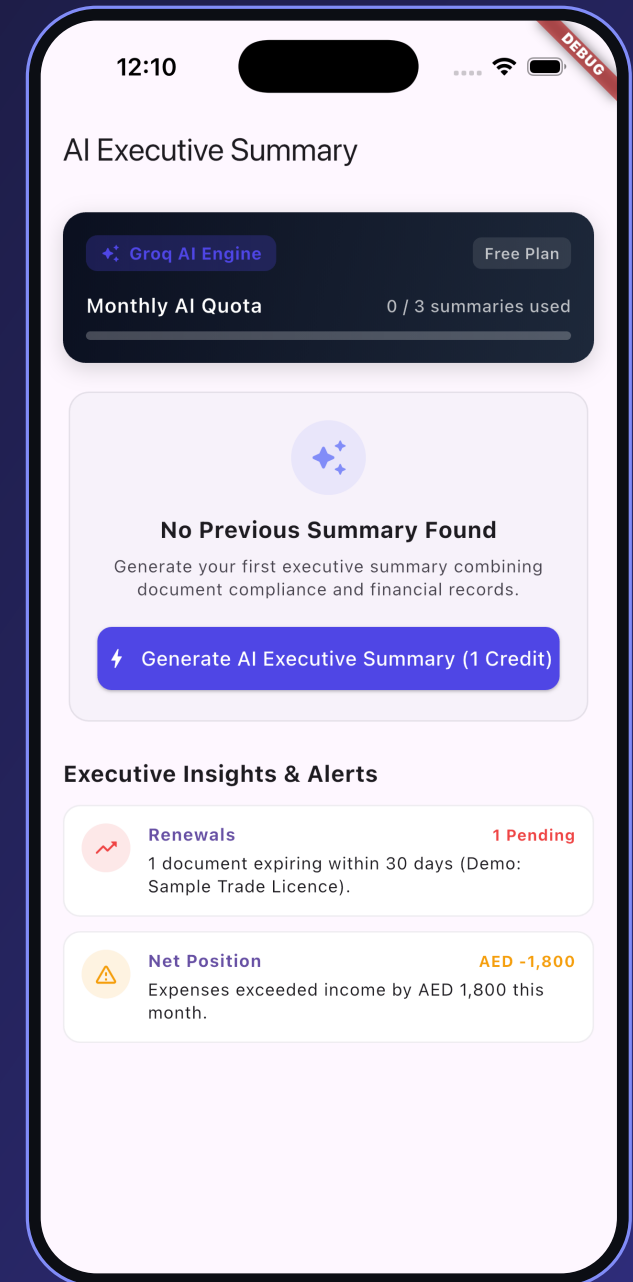

Not a gimmick: AI that does the boring parts of running a company - typing, categorizing, summarizing and planning.

SCREEN - AI SUMMARY

Your executive brief, generated

FV reads your month - spending, budgets, upcoming renewals - and writes the summary a good CFO would: what changed, what is coming, what needs a decision.

- Works out of the box with a built-in key; bring your own for more.
- Executive tone, GCC context, zero setup.
- Regenerate anytime as new data lands.

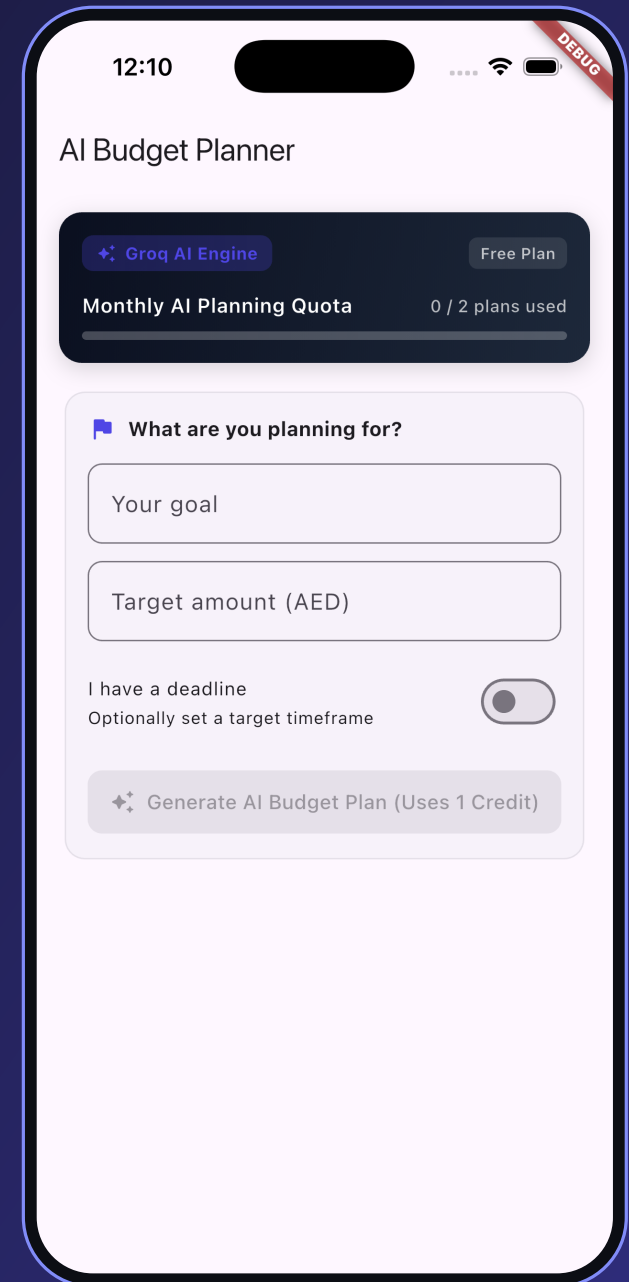

SCREEN - AI PLANNER

Say the goal, get the plan

"I want to buy a delivery van by March." The AI budget planner turns that into a monthly savings plan and tracks it in your budgets automatically.

- Natural-language goals become concrete monthly plans.
- Plans live in the Budgets tab and warn you when you drift.
- Great for Hajj trips, equipment, expansions, stock-ups.

PART 4

Yours, and private by design

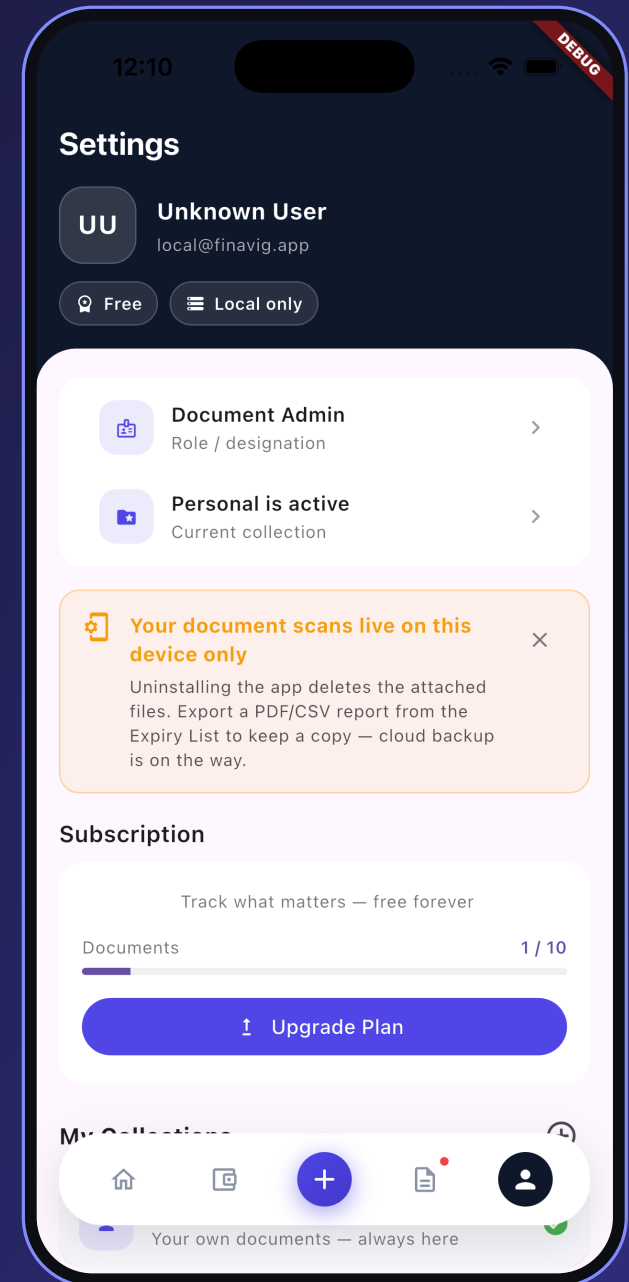

Local-first storage, your data exportable anytime,
and reminders that actually reach you.

SCREEN - PROFILE

Your account and controls

Manage workspaces, plan, backup and preferences from one hub. Download your entire dataset as JSON whenever you want - no lock-in, ever.

- One-tap data export: it is your data, take it anywhere.
- Reminder health check so alerts always reach you.
- Upgrade to Plus or Business when you outgrow Free.

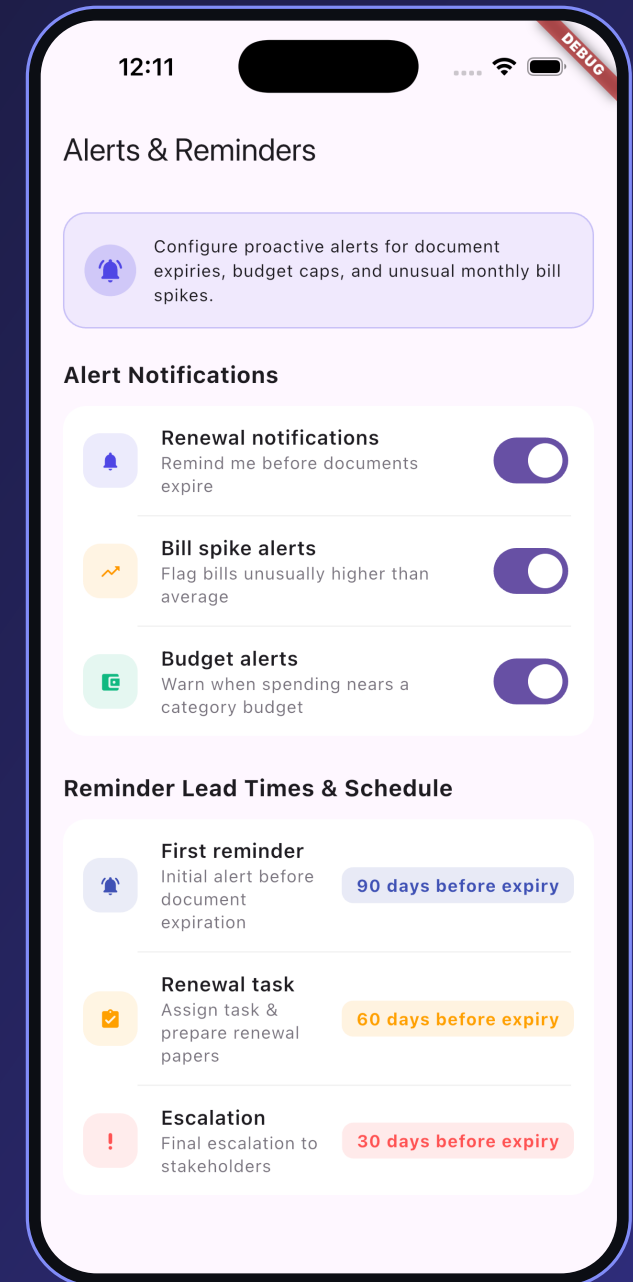

SCREEN - ALERTS

Reminders that actually fire

A dedicated center for every alert FV sends: renewals, budget warnings, anomalies. Tune lead times and channels to match how you work.

- 90/60/30/14/7/1-day escalation ladder for renewals.
- Notification deep links open the exact document.
- Set-up helper for notification permissions.

Be our first user.

You have now seen every screen. Here is how it ships:

Free

AED 0

Core document tracking, one workspace, manual money logging, renewal alerts. Everything a single company needs to start.

Plus

monthly

AI summaries, budget plans, multi-year history, advanced forecasts and priority support.

Business

per seat

Multi-company workspaces, team access, exports and reporting for accountants and PRO teams.

FV

Founding-user offer: onboarding, data import help and a direct line to the builder. Your feedback shapes the roadmap - and you keep it for free.
