

Finavig (FV)

Financial & Document Intelligence for GCC businesses

Document deadlines, company money and AI insights in one local-first app.

Every screenshot below is the live app running with demo data.

Why

Every GCC company juggles the same three failures ☹️ and the tools that should help were built for someone else.

Missed renewals mean fines. Trade licences, Emirates IDs, visas, insurance, Mulkiya. They live in WhatsApp threads and desk drawers, and every missed date converts straight into government fines and blocked services.

Money is scattered. Receipts in shoeboxes, salaries in one sheet, supplier payments in another. Nobody can answer "what do we actually have left this month?" without an hour of archaeology.

Generic apps do not fit. Global finance apps ignore renewals entirely. Document managers ignore money. GCC businesses need both in one place, speaking AED and Arabic-name reality.

One missed trade licence can cost more than a year of FV ☹️ in fines alone.

How

1. Scan or add a document. Point the camera at a trade licence, Emirates ID or visa. Files stay on your phone.

2. AI reads it for you. Expiry date, renewal fee, vendor and document type are extracted automatically.

3. Log money in one sentence. "Spent 85 AED on Uber." FV picks the category, date and currency. Recurring bills log themselves.

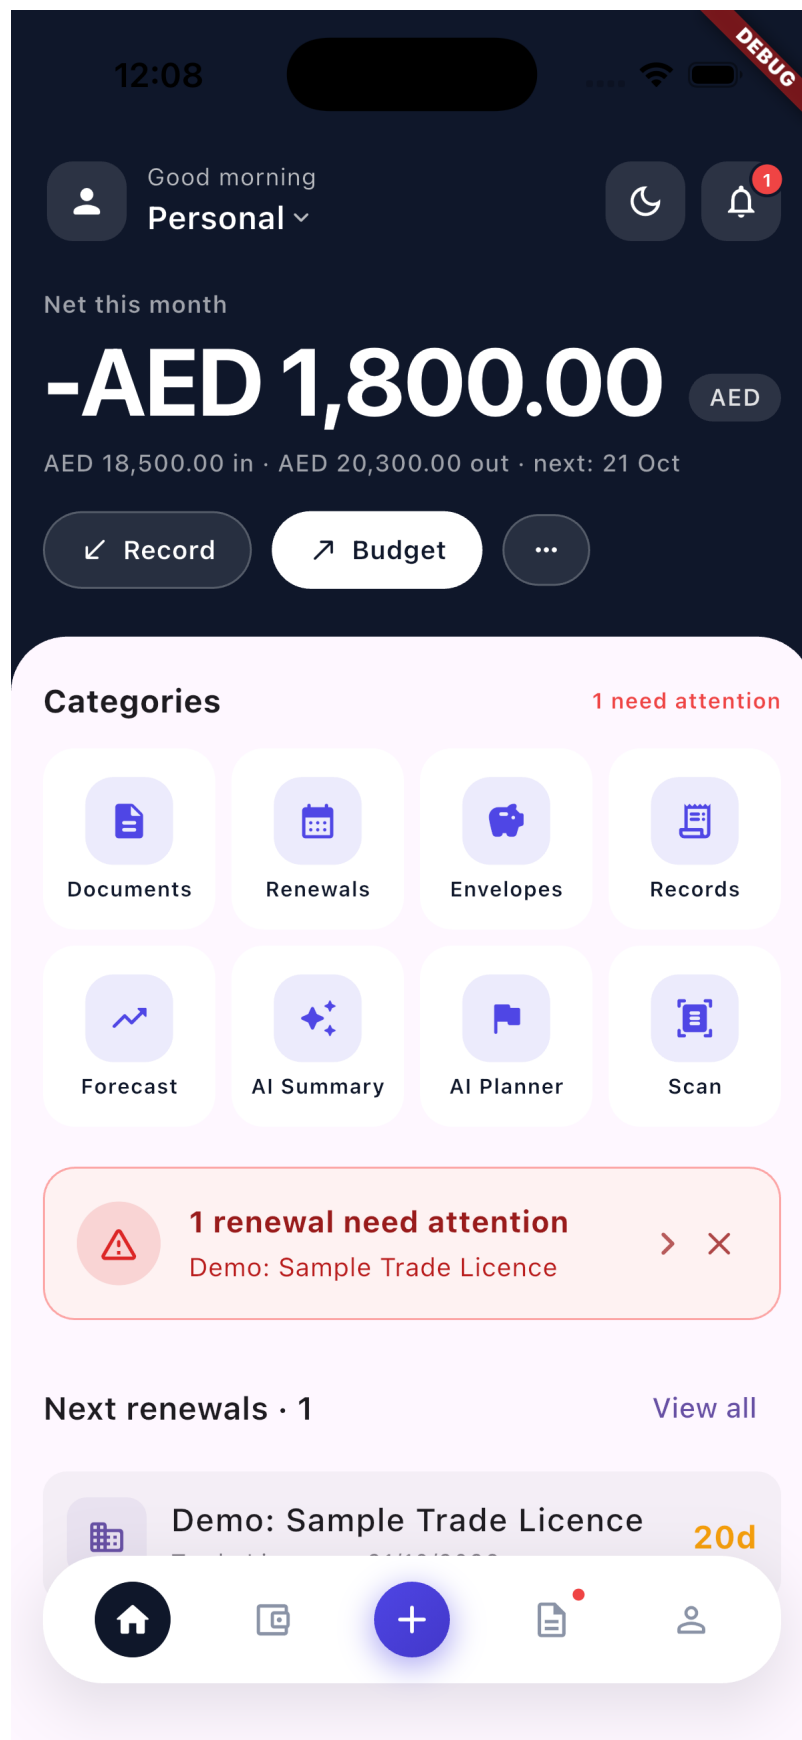

4. Get warned, then relax. Escalating reminders before every deadline, budget warnings as you approach limits, and a 90-day cash forecast.

Under the hood: local-first storage. Your documents and records live on your device and sync to your private cloud account ☹️ fast offline access, no vendor lock-in, one-tap data export. We never sell your data or train public AI models on it.

What

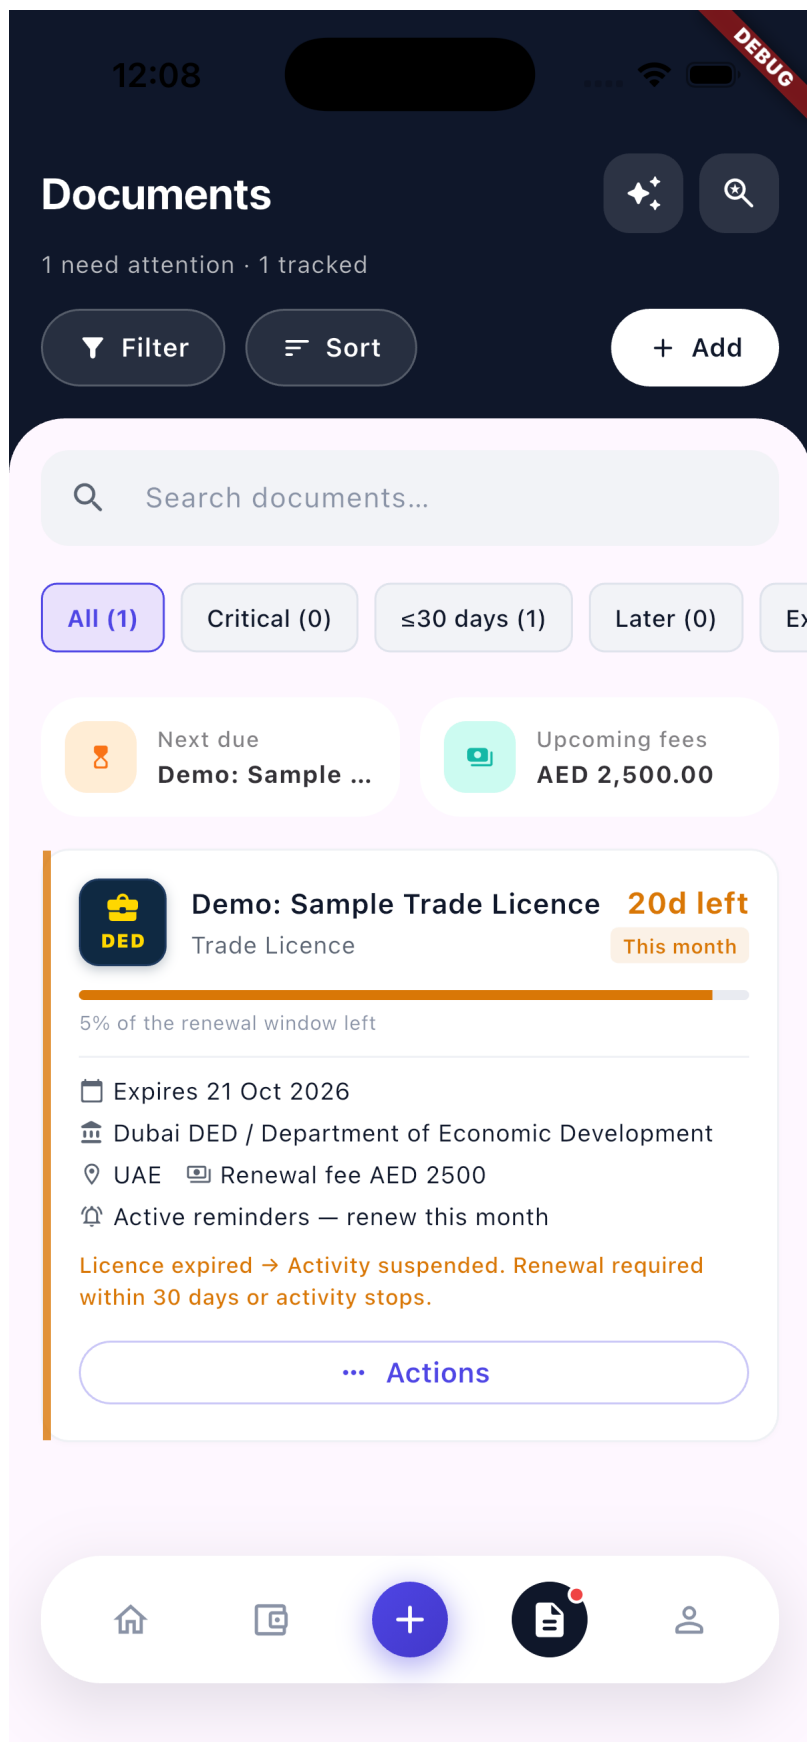

Home 📱 your day at a glance

Open FV and see what needs attention today: documents nearing deadline, plan status, one-tap actions. Urgency-sorted feed: what expires soonest floats to the top. Scan or log money in two taps.

Documents the company vault

Trade licences, IDs, passports, visas, Mulkiya, insurance, contracts  one searchable place, per company or client. Camera scan with AI extraction of dates, fees and vendors.

Document detail every detail, one tap away

Countdown, renewal fee, stored files and history for any document. Renew, pay and share from one screen.

Urgency timeline

Deadlines & renewals ranked by urgency

One ranked list of everything expiring across all your companies. Alerts fire at 90, 60, 30, 14, 7 and 1 day & lead times you control. Export as CSV or PDF for your accountant.

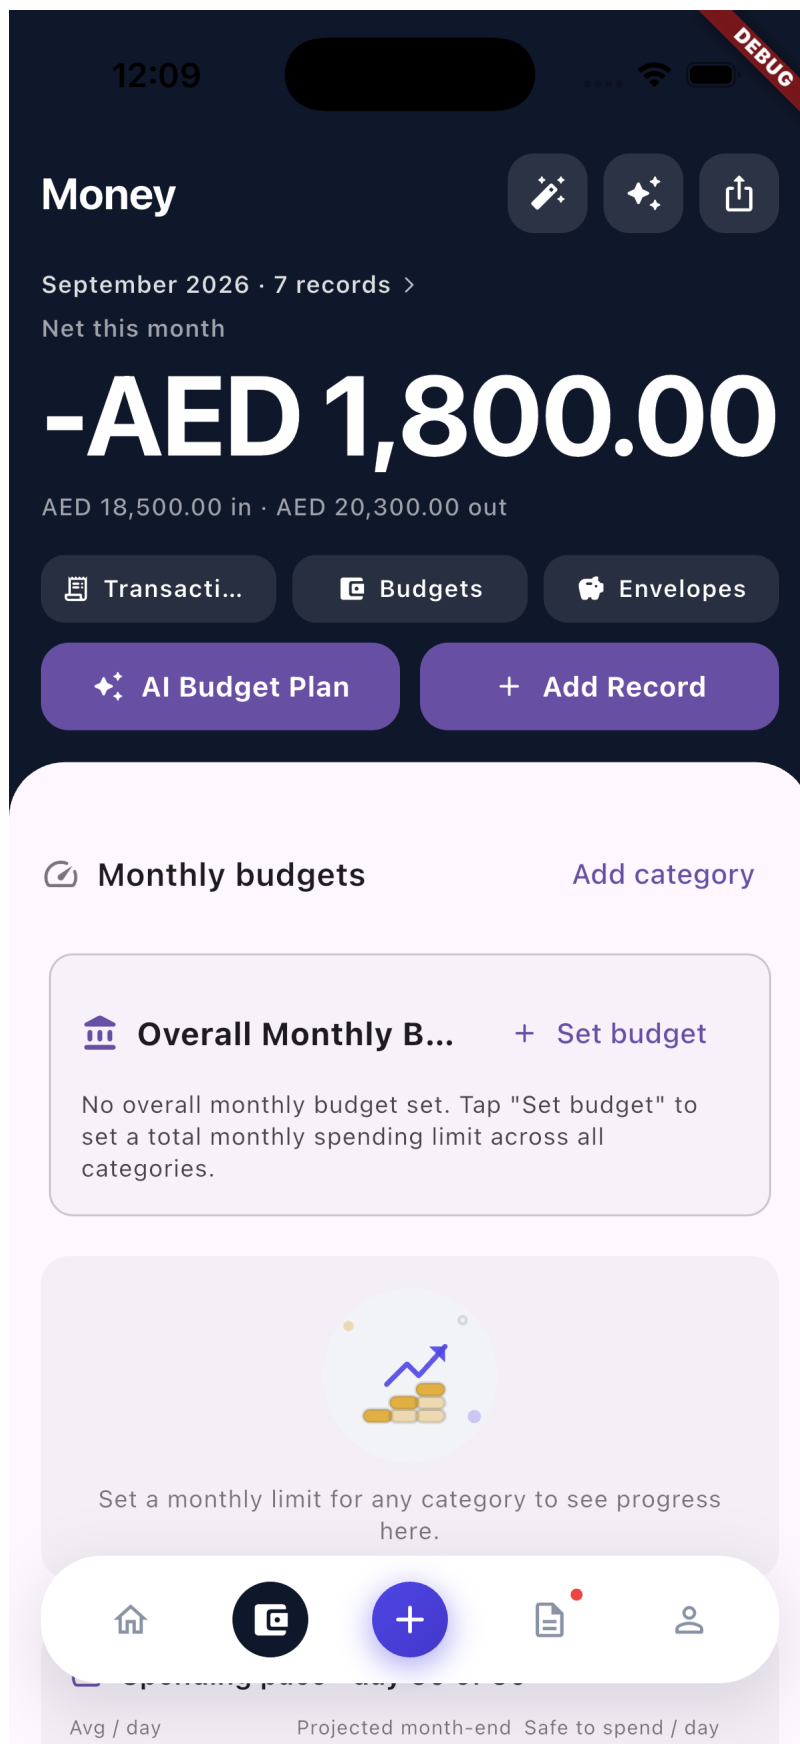

Search 🔍 find anything in seconds

Search across every document by name, number or notes. Built for the "send me the licence now" moments.

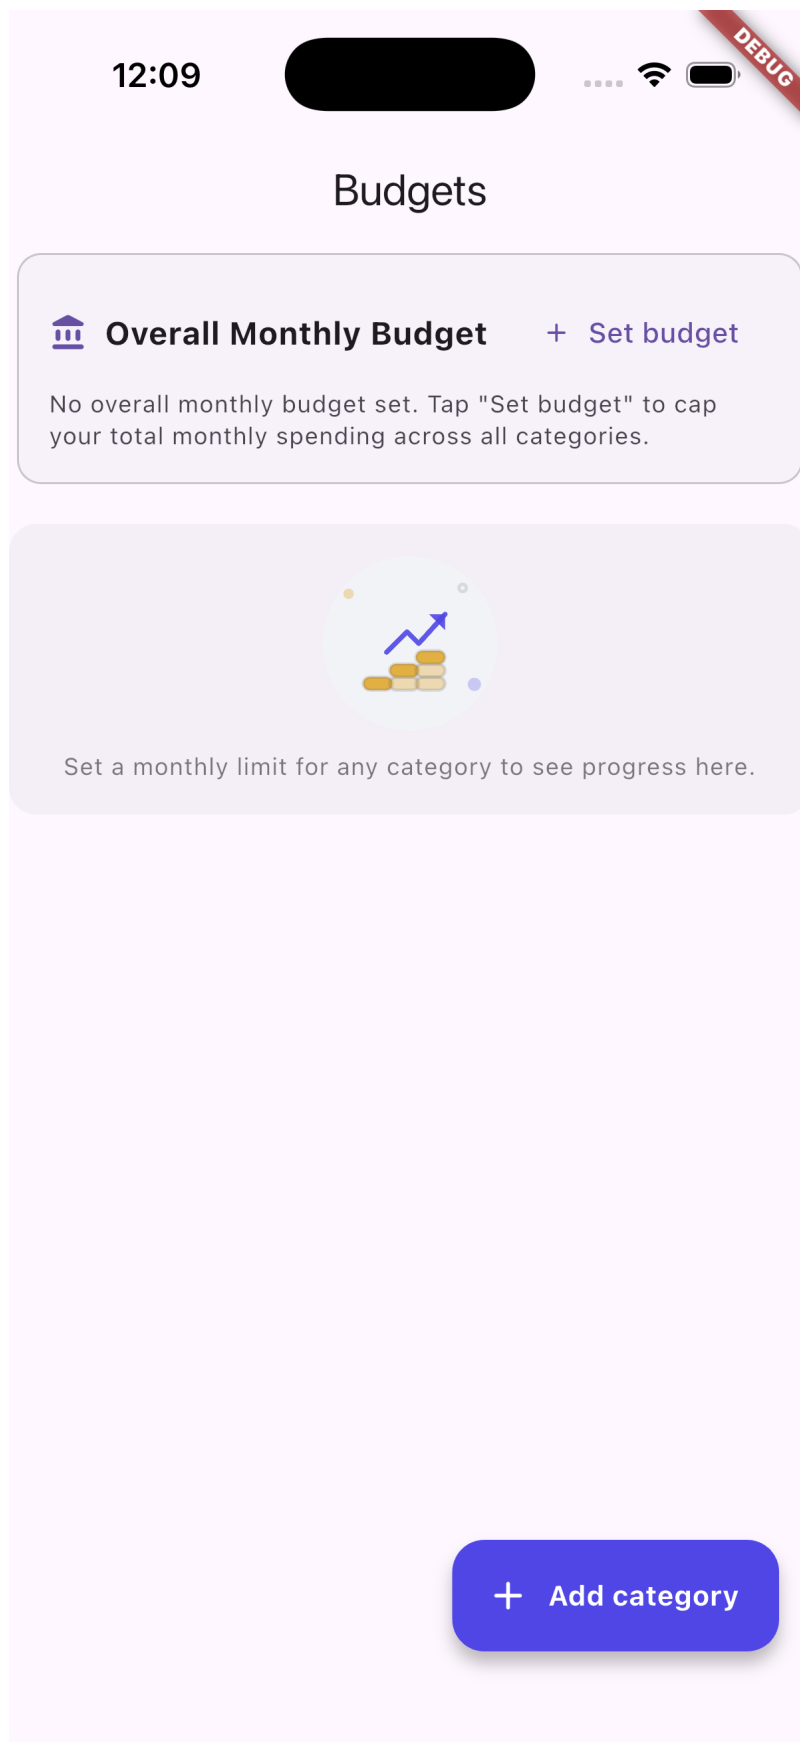

Money ☒ income and expenses, auto-organized

Type or speak one sentence and the transaction is logged, categorized and dated against a UAE merchant dictionary. Recurring rent, salaries and subscriptions auto-log when due. Anomaly alerts on 35%+ jumps in recurring costs.

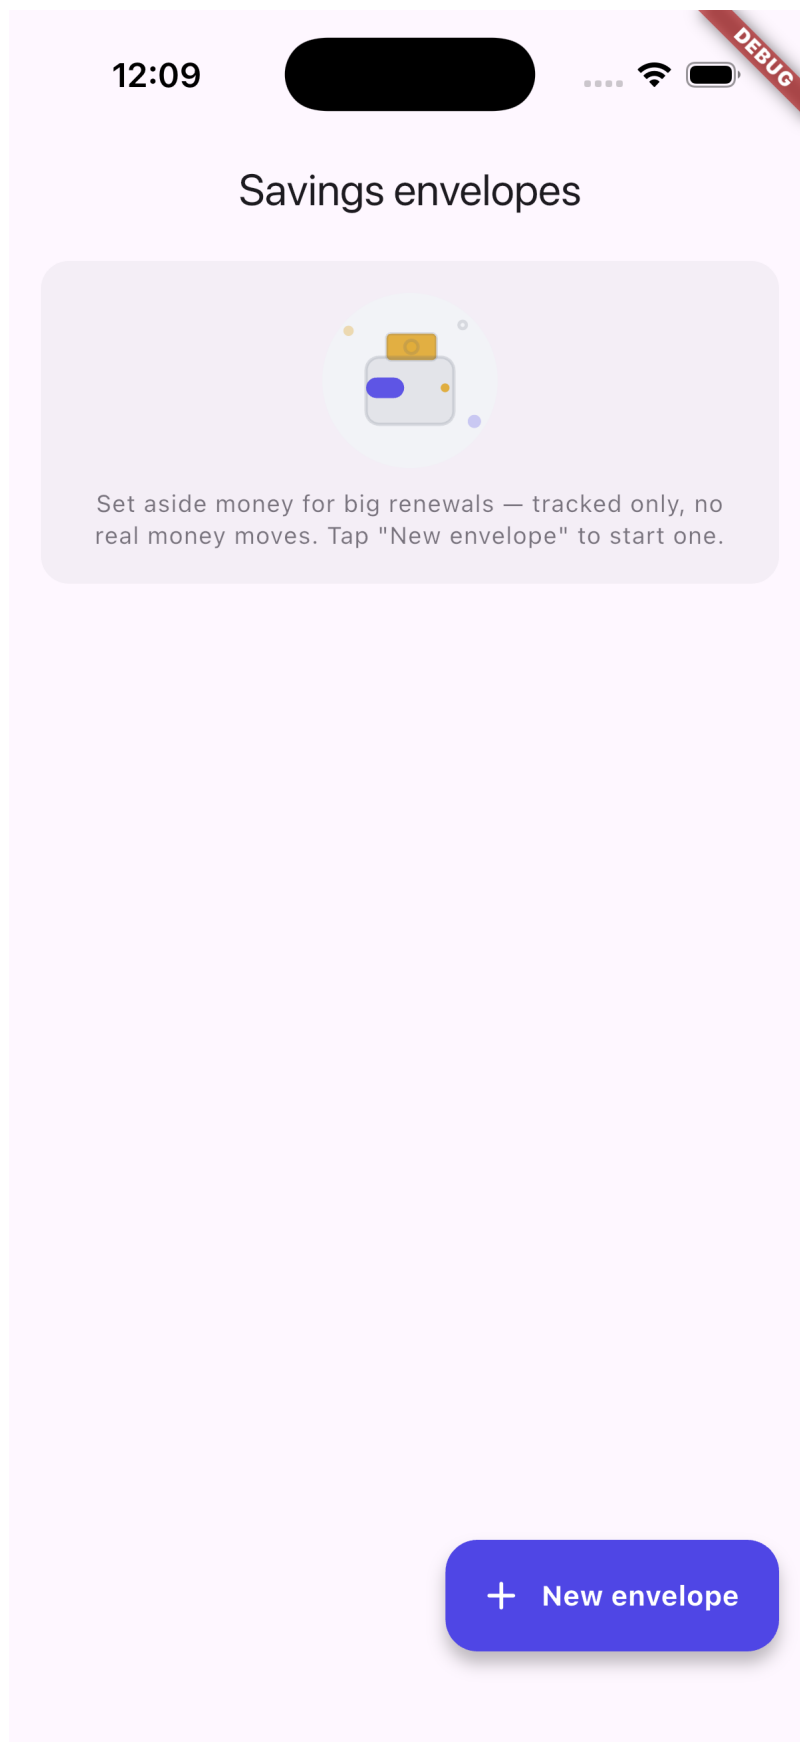

Budgets ⚠ warnings before overspend

Set a monthly limit per category. FV tracks the burn and warns you as you approach it ⚠ before the money is gone, not after.

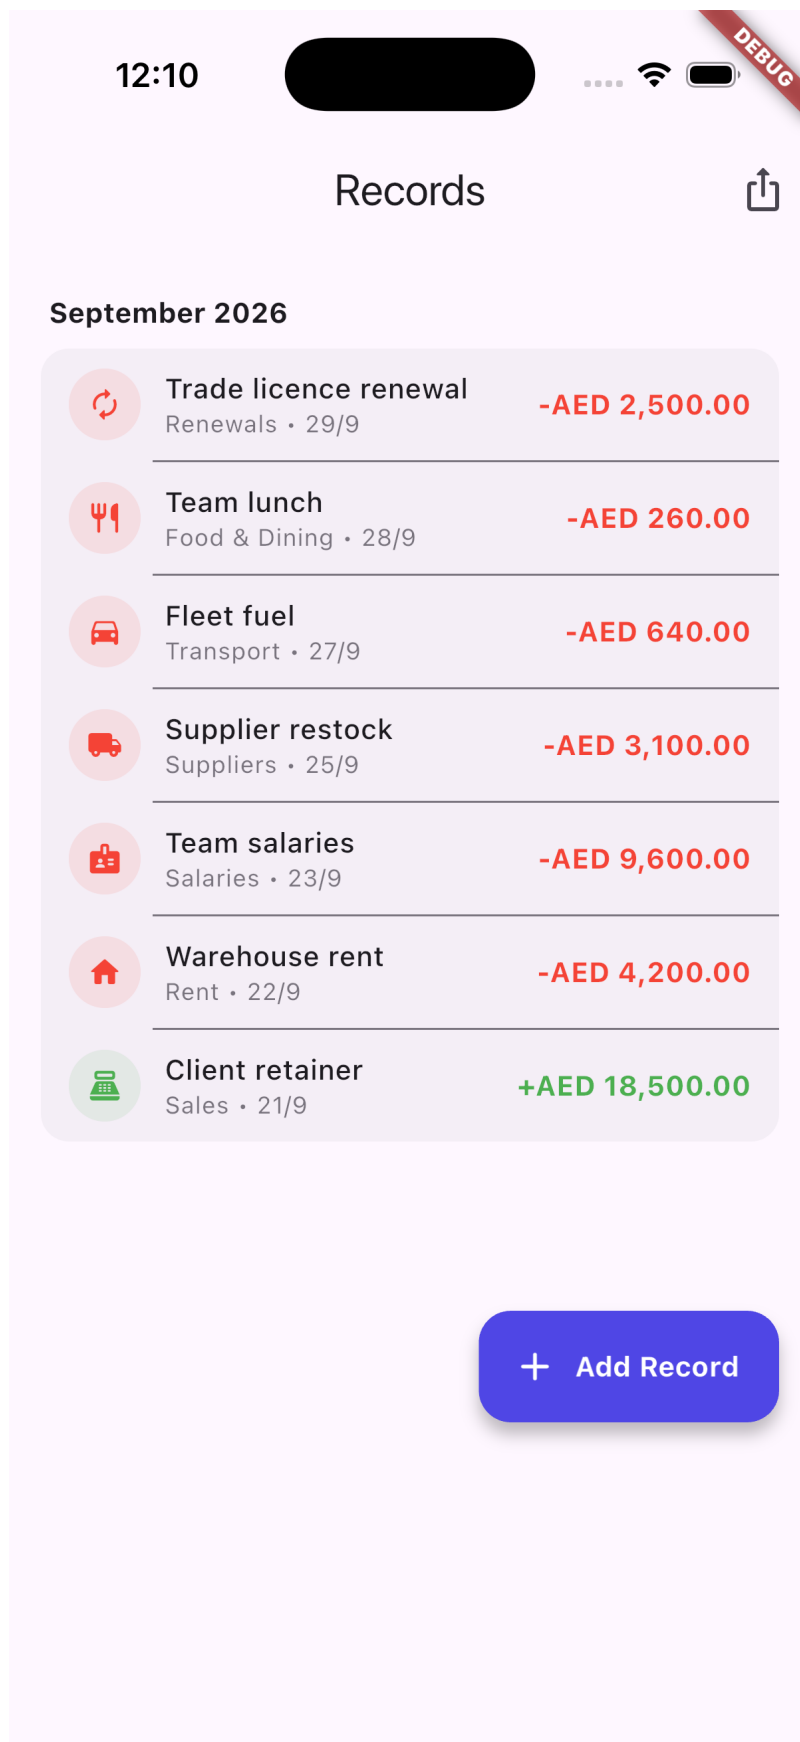

Envelopes 📁 save for known big costs

Set money aside for the things you know are coming: renewal season, Eid stock-ups, the new chiller. One envelope per goal with progress at a glance.

Records a clean ledger

Every transaction, searchable and filterable by category, kind, date or company. Export for bookkeeping whenever you need it.

Cash flow the 90-day forecast

Bank balance, upcoming recurring bills and document renewal fees combined into one forecast. See the tight weeks coming while there is still time to act.

Document Renewal Fee

FV reads your month's spending, budgets, upcoming renewals and writes the summary a good CFO would: what changed, what is coming, what needs a decision. Works out of the box with a built-in key; bring your own for more depth.

AI planner ✂ say the goal, get the plan

"I want to buy a delivery van by March." The planner turns that into a monthly savings plan tracked in your budgets.
