FINAVIG

FINANCIAL & DOCUMENT
INTELLIGENCE

The command center for GCC businesses.

Document deadlines, company money and AI insights in one local-first app. Every screen in this deck is the live app with demo data.

WHY · HOW · WHAT

Paper deadlines eat profits.

Every GCC company juggles the same three failures - and the tools that should help were built for someone else.

Missed renewals mean fines

Trade licences, Emirates IDs, visas, insurance, Mulkiya. They live in WhatsApp threads and desk drawers, and every missed date converts straight into government fines and blocked services.

Money is scattered

Receipts in shoeboxes, salaries in one sheet, supplier payments in another. Nobody can answer "what do we actually have left this month?" without an hour of archaeology.

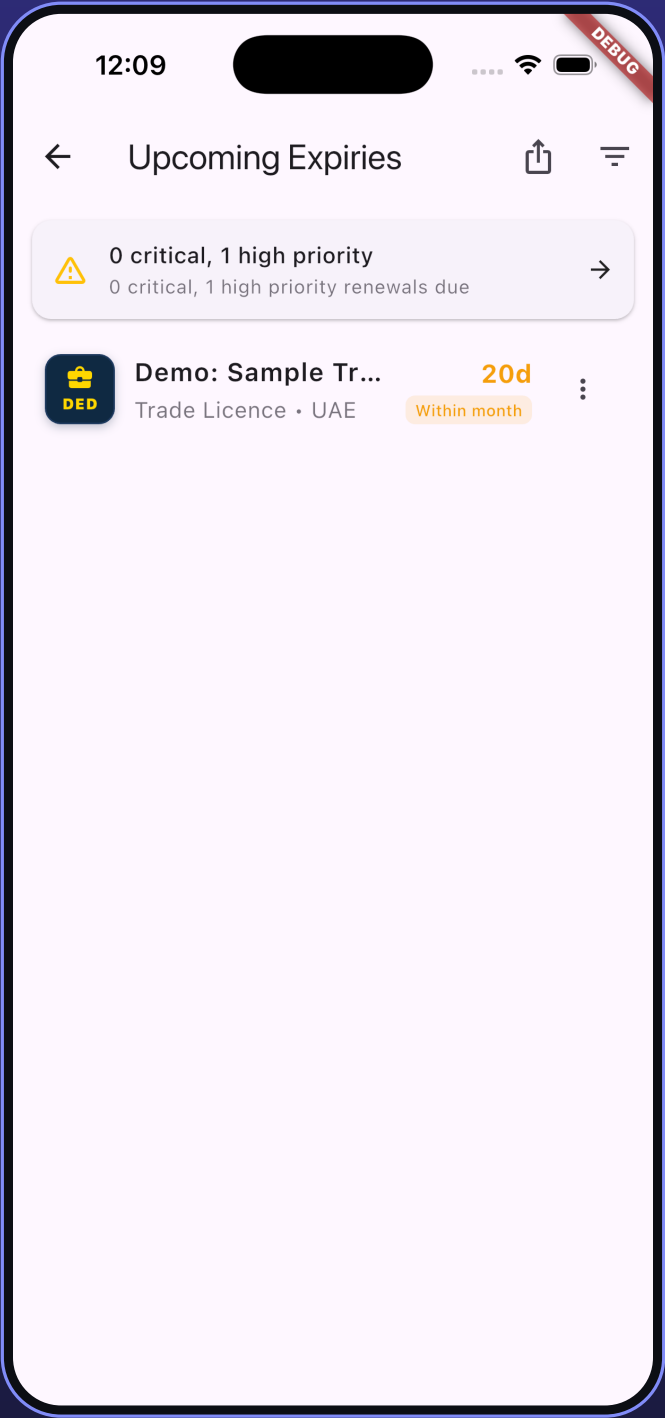

Generic apps do not fit

Global finance apps ignore renewals entirely. Document managers ignore money. GCC businesses need both in one place, speaking AED and Arabic-name reality.

One missed trade licence can cost more than a year of FV - in fines alone.

Urgency, not alphabet.

Spreadsheets list documents by name. FV ranks them by how soon they bite: a live countdown, colored by urgency, with the renewal fee attached so the cash is planned too.

Alerts fire at 90, 60, 30, 14, 7 and 1 day - you choose.

Four steps. Zero spreadsheets.

1

Scan or add a document

Point the camera at a trade licence, Emirates ID or visa. Files stay on your phone.

2

AI reads it for you

Expiry date, renewal fee, vendor and document type are extracted automatically - no typing marathons.

3

Log money in one sentence

"Spent 85 AED on Uber." FV picks the category, date and currency. Recurring bills log themselves.

4

Get warned, then relax

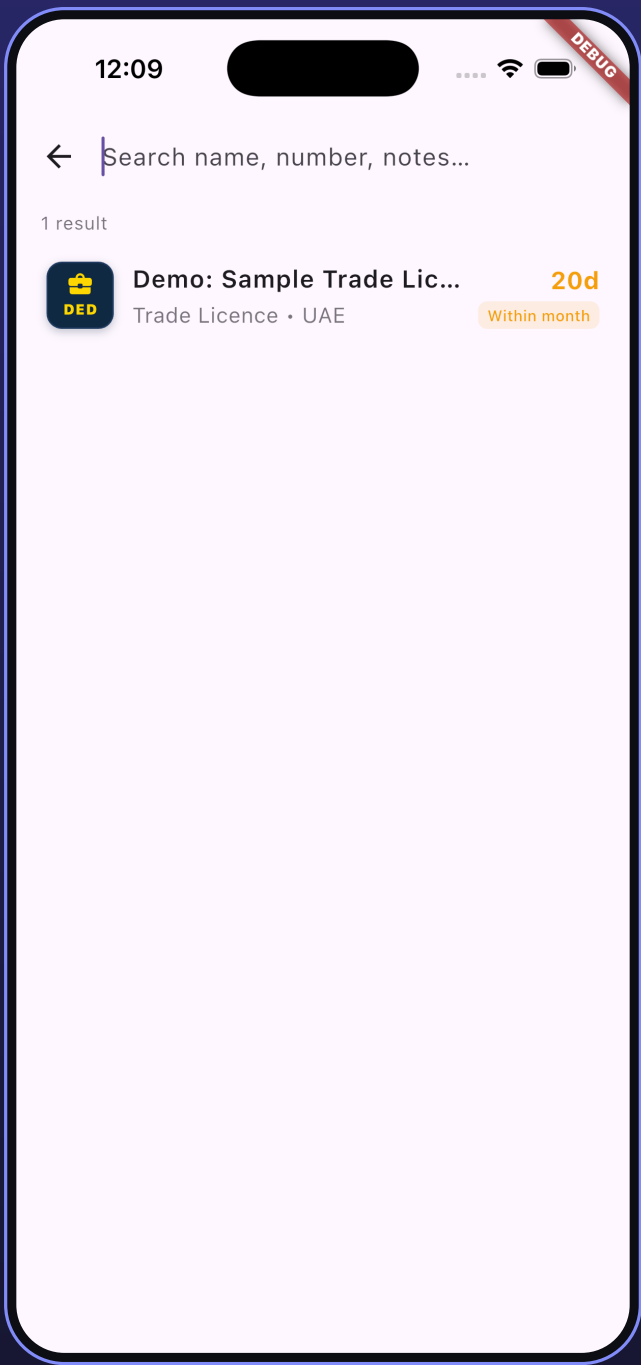

Escalating reminders before every deadline, budget warnings as you approach limits, and a 90-day cash forecast.

Setup takes minutes. The first alert usually saves a fine within the month.

Local-first. Private by design.

Your documents and records live on your device and sync to your private cloud account. Fast offline access, no vendor lock-in, and a one-tap export whenever you want out.

- Works fully offline - syncs when you reconnect.
- We never sell your data or train public AI models on it.
- Multi-company workspaces: one login, every entity tidy.
- Built-in AI key to start; bring your own for deeper reads.

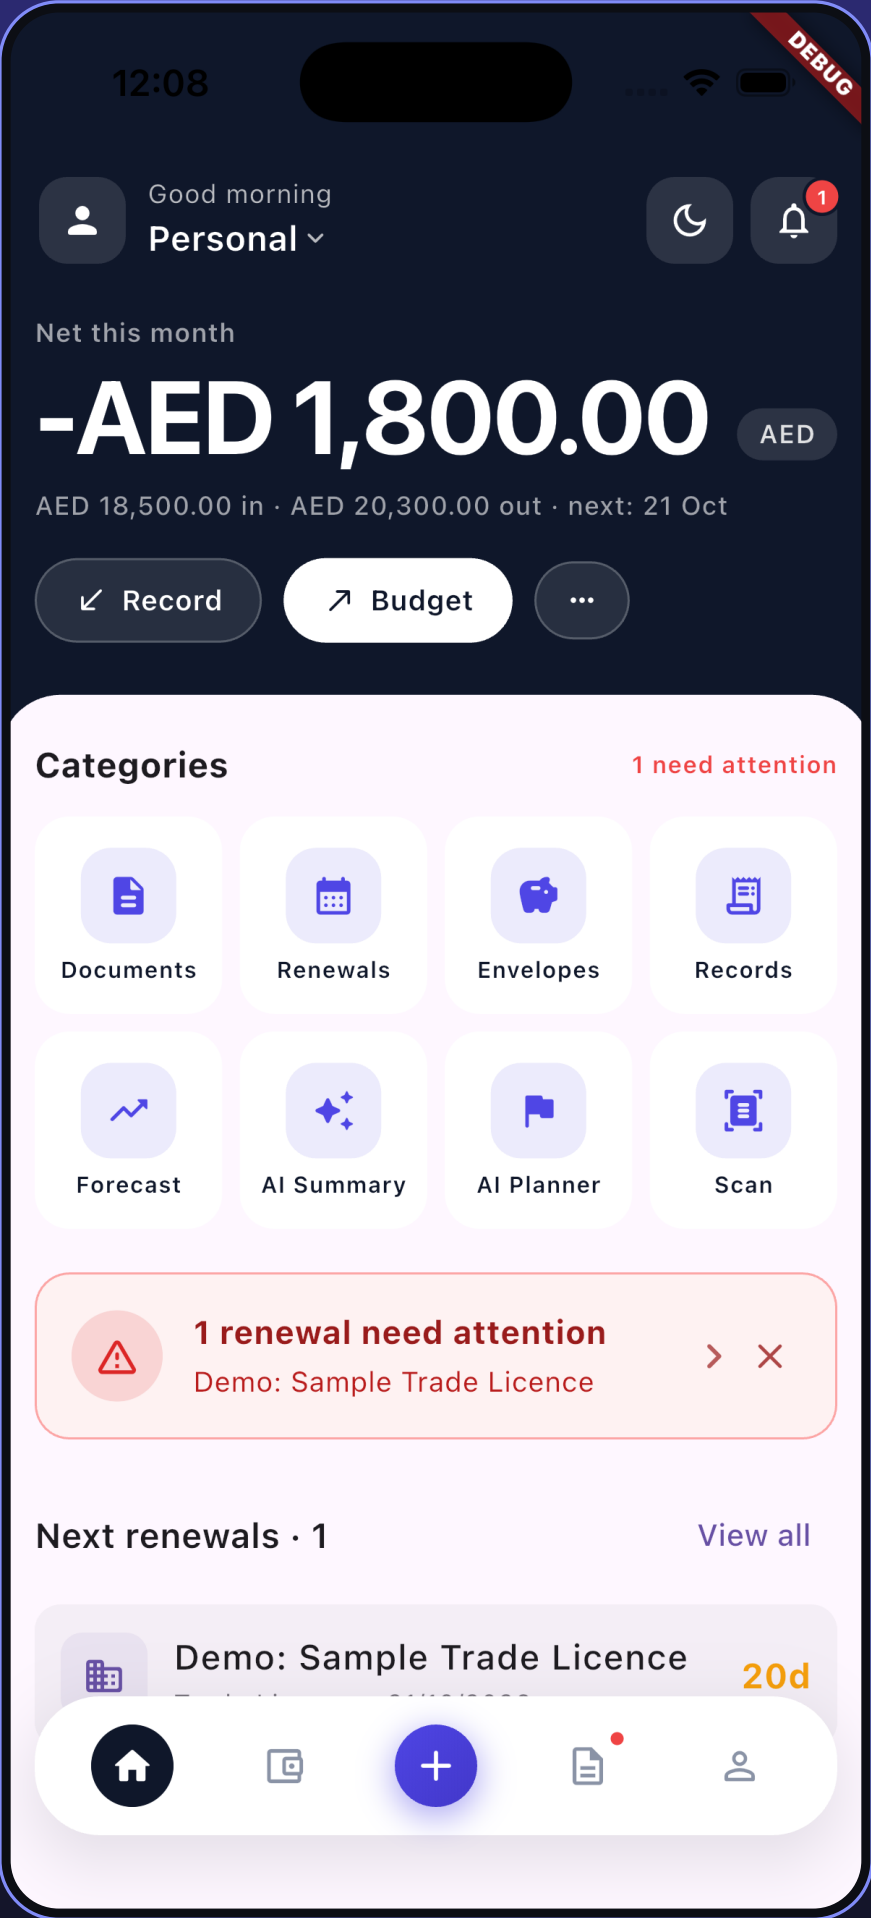

Find any document in seconds - by name, number or your own notes.

Home base

Open FV and see what needs attention today: documents nearing deadline, plan status, one-tap actions.

- Urgency-sorted feed - what expires soonest floats to the top.
- Scan or log money in two taps from the quick-action grid.
- Everything important is one tap deep, never more.

The document vault

Trade licences, IDs, passports, visas, Mulkiya, insurance, contracts - one searchable place, per company or client.

- Camera scan with AI extraction of dates, fees and vendors.
- Separate workspaces keep every entity and client tidy.
- Attach files, notes and renewal steps to each document.

Urgency timeline

Renewals ranked by urgency

One ranked list of everything expiring across all your companies, with lead times you control.

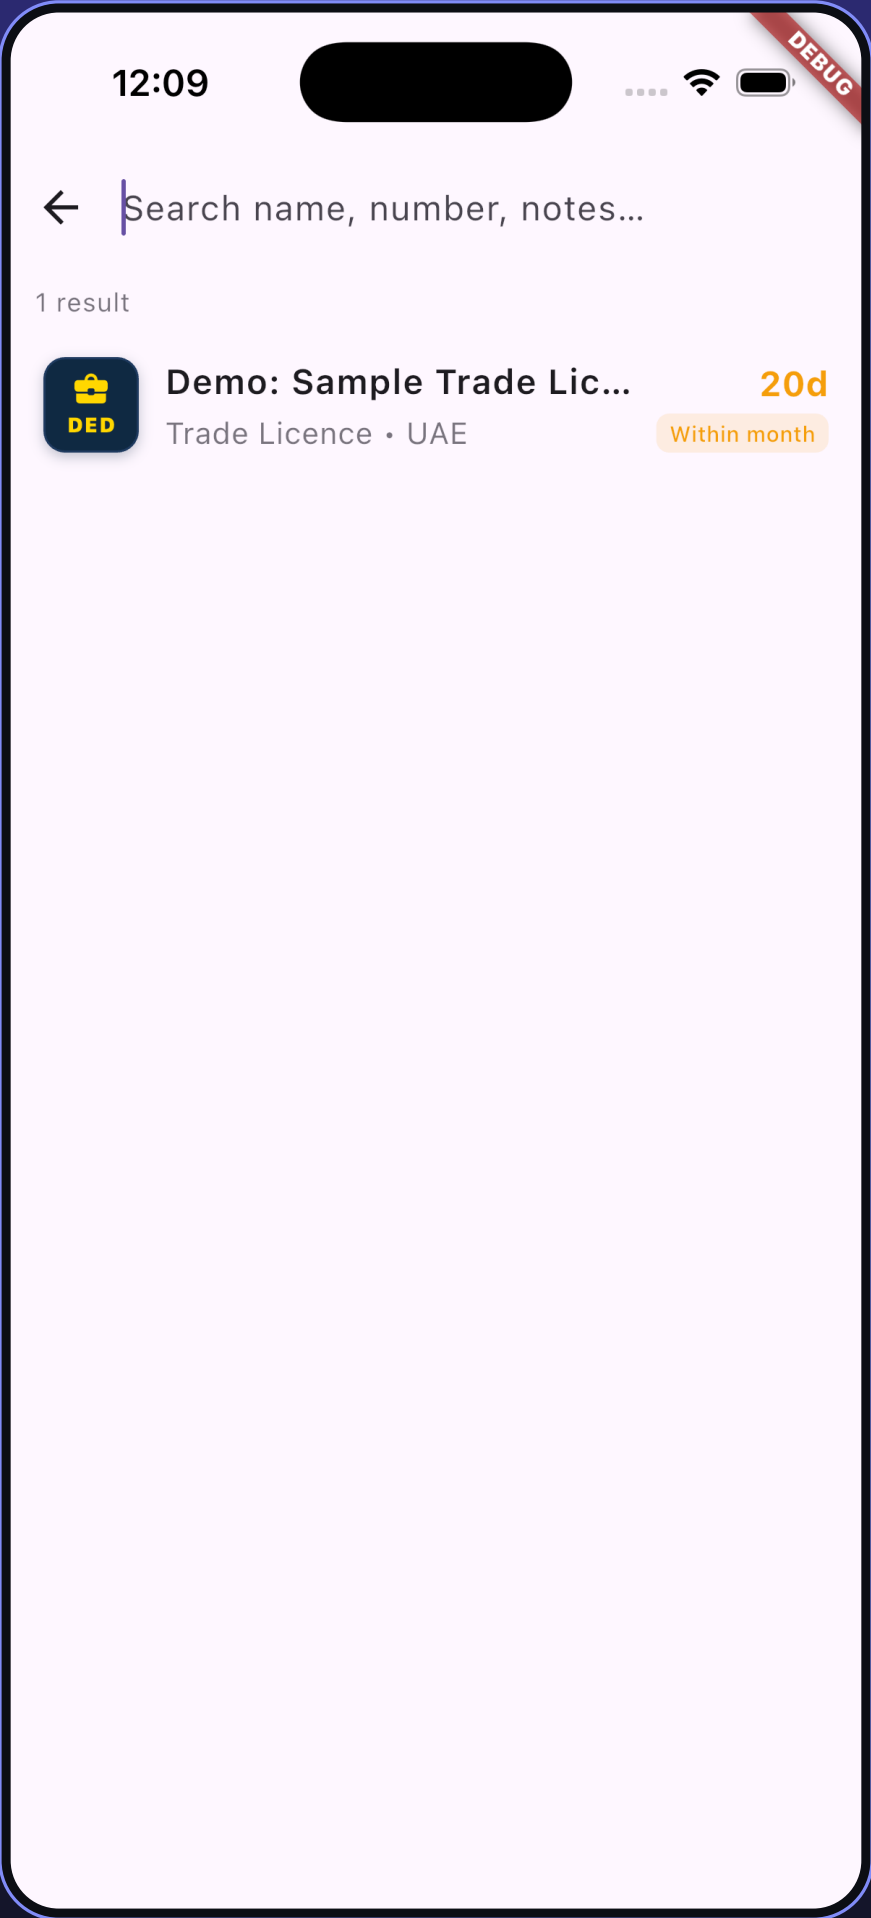

- Never pay an avoidable late-renewal fine again.
- Filter by company, type or urgency band.
- Export the list as CSV or PDF for your accountant.

Find anything in seconds

Search across every document by name, number or notes - built for the "send me the licence now" moments.

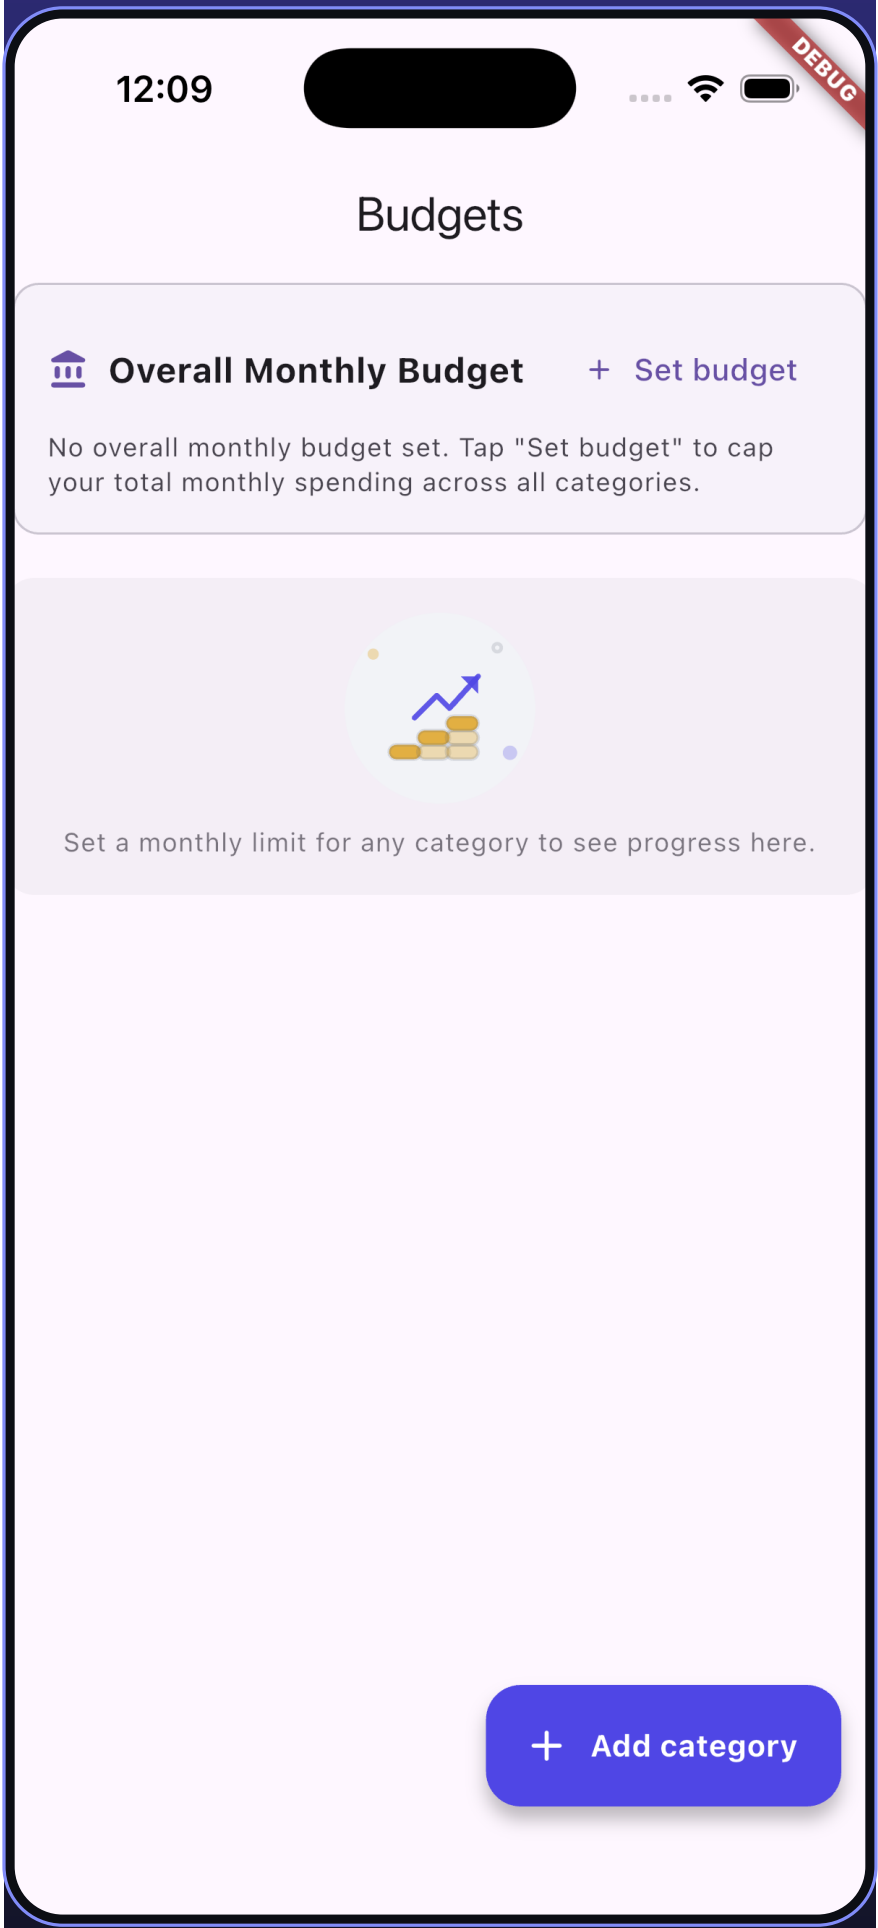

- Instant results across all workspaces.
- Search by plate number, licence ID or your own notes.
- Open, share or renew straight from the result.

Budgets that warn you

Set a monthly limit per category. FV tracks the burn and warns you as you approach it - before the money is gone.

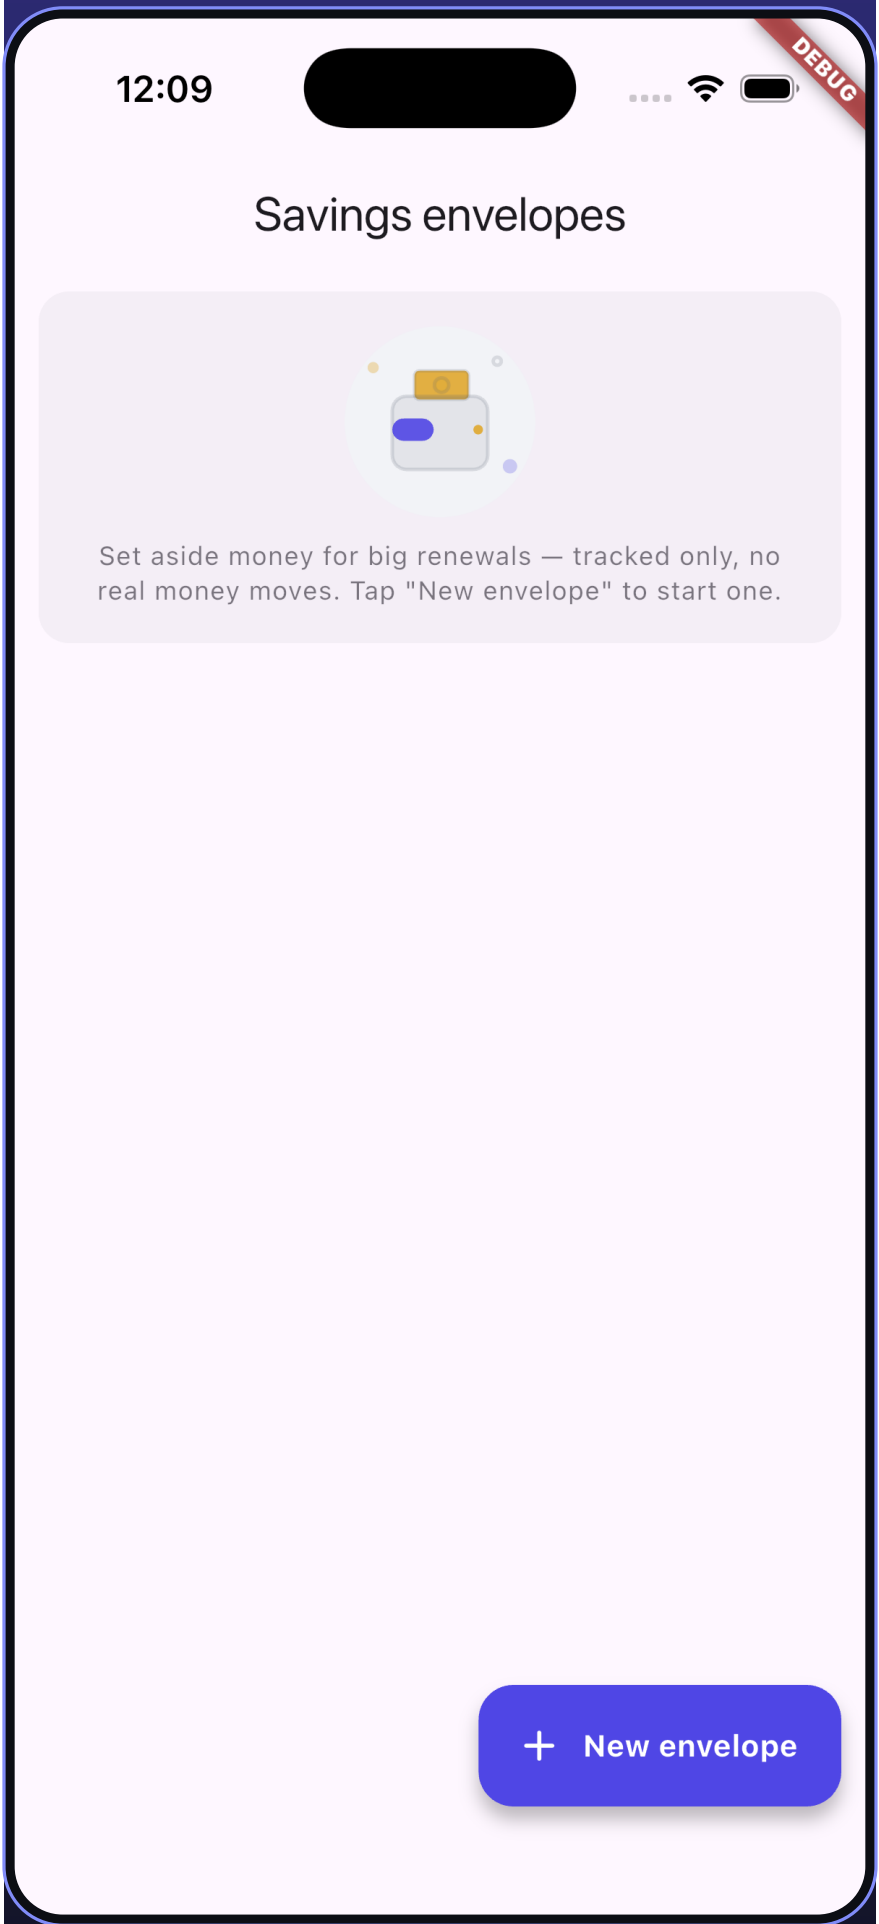

- Category budgets with proactive overspend warnings.
- Renewal fees fold into the plan automatically.
- Alerts arrive as notifications you can act on.

Envelope saving

Set money aside for the things you know are coming: renewal season, Eid stock-ups, the new chiller.

- One envelope per goal with progress at a glance.
- Move money between envelopes when priorities shift.
- Pairs with budgets for complete control.

A clean ledger

Every transaction, searchable and filterable. Your accountant will thank you - so will future-you in VAT season.

- Filter by category, kind, date range or collection.
- Edit or duplicate entries in two taps.
- Export for bookkeeping whenever you need it.
