

FINAVIG

FINANCIAL & DOCUMENT INTELLIGENCE

The command center for GCC businesses.

Document deadlines, company money and AI insights in one local-first app.
Built in the UAE, for the way business actually runs here.

PRODUCT PITCH - FIRST LOOK

THE PROBLEM

Paper deadlines eat profits.

Every GCC company juggles the same three failures - and the tools that should help were built for someone else.

Missed renewals mean fines

Trade licences, Emirates IDs, visas, insurance, Mulkiya. They live in WhatsApp threads and desk drawers, and every missed date converts straight into government fines and blocked services.

Money is scattered

Receipts in shoeboxes, salaries in one sheet, supplier payments in another. Nobody can answer "what do we actually have left this month?" without an hour of archaeology.

Generic apps do not fit

Global finance apps ignore renewals entirely. Document managers ignore money. GCC businesses need both in one place, speaking AED and Arabic-name reality.

THE SOLUTION

One app. Four pillars.

Finavig (FV) unifies what GCC businesses juggle today across four or more disconnected tools.

1

Documents & expiry

Scan, store and track every company document. Deadline alerts at 90/60/30/14/7/1 days, renewal fees included.

2

Money & budgets

GCC-currency expenses and income, auto-categorized, with category budgets and a 90-day cash-flow forecast.

3

Multi-company

Separate workspaces per entity or client, so PROs and accountants keep everyone organized in one login.

4

AI built in

Ask FV AI logs money or documents from one sentence. Executive summaries and budget plans, generated.

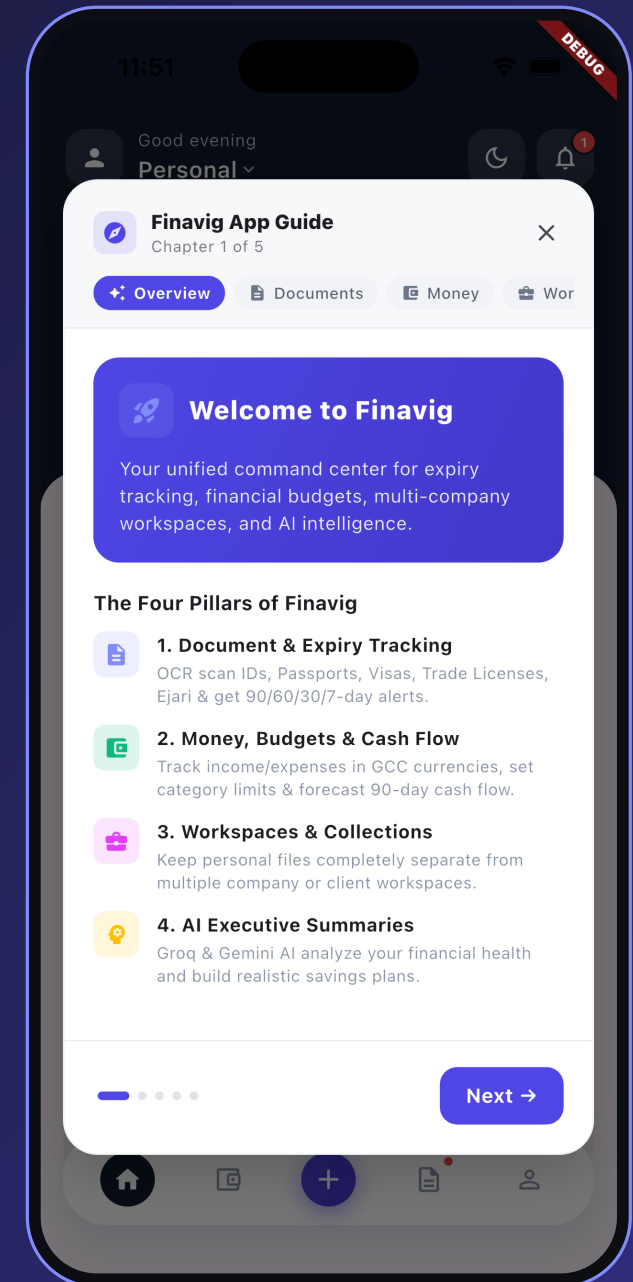

Local-first by design: your documents and records live on your device and sync to your private cloud account - fast offline access, no vendor lock-in, data export anytime.

LIVE SCREEN - HOME

Your whole business day, on one screen

Open FV and see everything that needs attention today: documents approaching their deadline, cash position, and quick actions. No digging through folders.

- Urgency rings surface documents by deadline, not alphabet.
- Quick actions: scan a document or log money in two taps.
- Hold the sparkle button to talk - Ask FV AI does the typing.

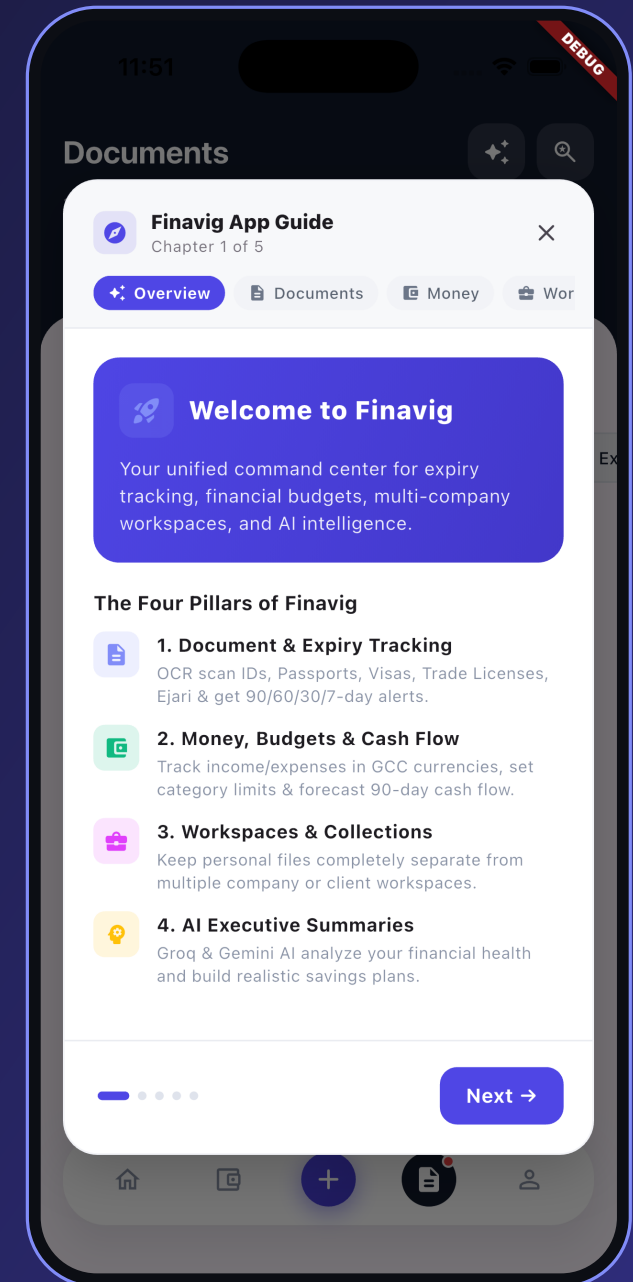

LIVE SCREEN - DOCUMENTS

Every licence, ID and visa in one vault

Trade licences, Emirates IDs, passports, visas, Mulkiya, insurance, contracts. Scan with the camera and the AI extracts the dates, amounts and vendors for you.

- OCR scan: point the camera, get structured data back.
- Multi-company workspaces keep client entities separate.
- Files stay on your phone; nothing is sold or shared.

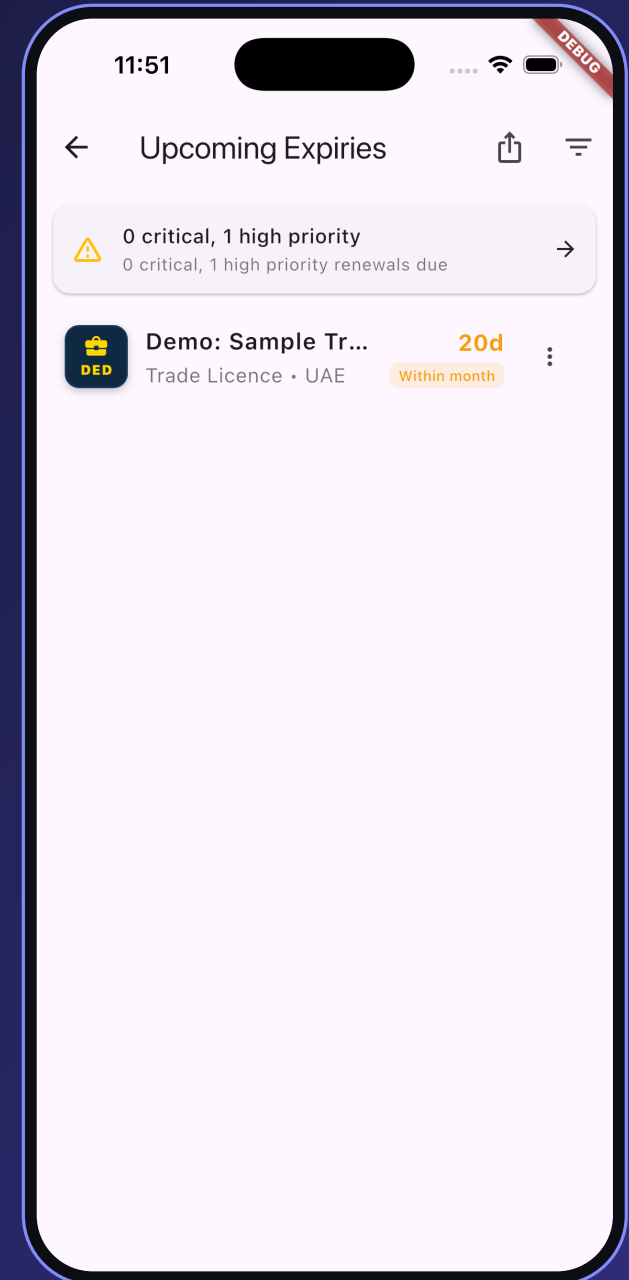

LIVE SCREEN - DEADLINES

Renewal alerts before the fines do

FV watches every expiry and warns you at 90, 60, 30, 14, 7 and 1 day. Lead times are customizable, and each document tracks its renewal fee so you can plan the cash.

- A single ranked list of what expires next across all entities.
- Renewal fees feed straight into your cash-flow forecast.
- Log the renewal payment against the document in one tap.

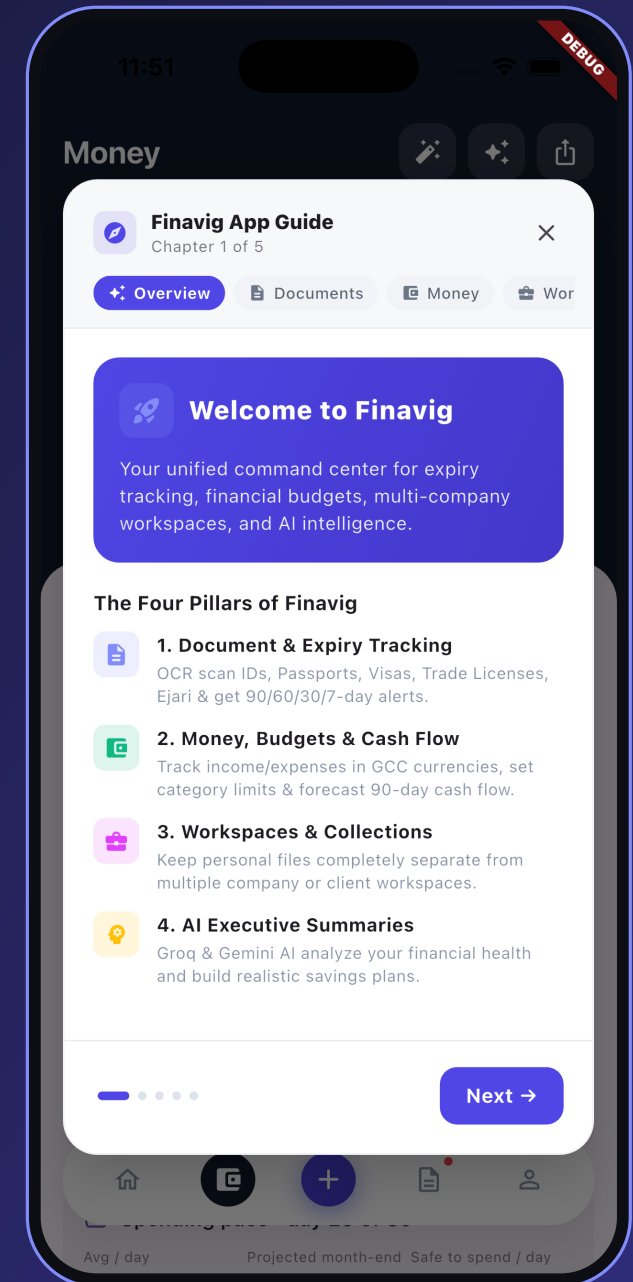

LIVE SCREEN - MONEY

Money in and money out, finally organized

Expenses and income in GCC currencies, auto-categorized against a UAE merchant dictionary. Recurring bills log themselves, and sudden price jumps raise a flag.

- Say it once: "Spent 85 AED on Uber" - category and date handled.
- Recurring rent, salaries and subscriptions auto-log when due.
- Anomaly detection alerts on 35%+ jumps in recurring costs.

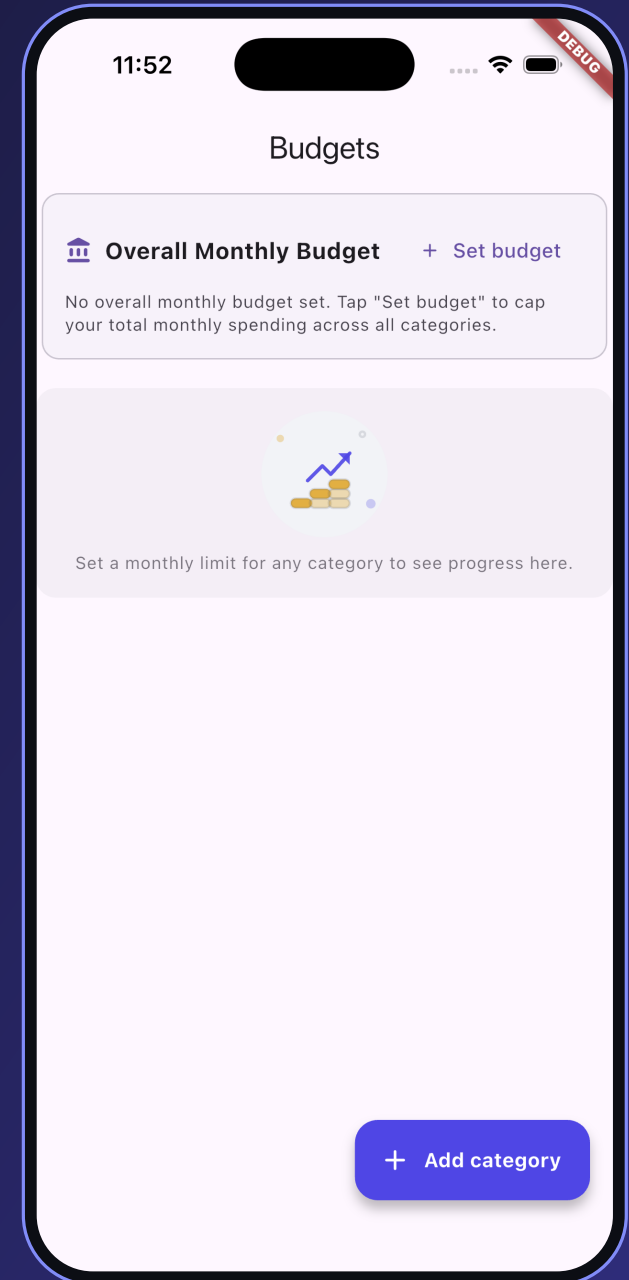

LIVE SCREEN - BUDGETS

Budgets that warn you before you overspend

Set a monthly limit per category and FV tracks the burn, warns you as you approach it, and folds everything into a 90-day cash-flow forecast.

- Category envelopes with proactive overspend warnings.
- 90-day cash forecast: balance, bills, renewals combined.
- Budget alerts delivered as notifications, not nag screens.

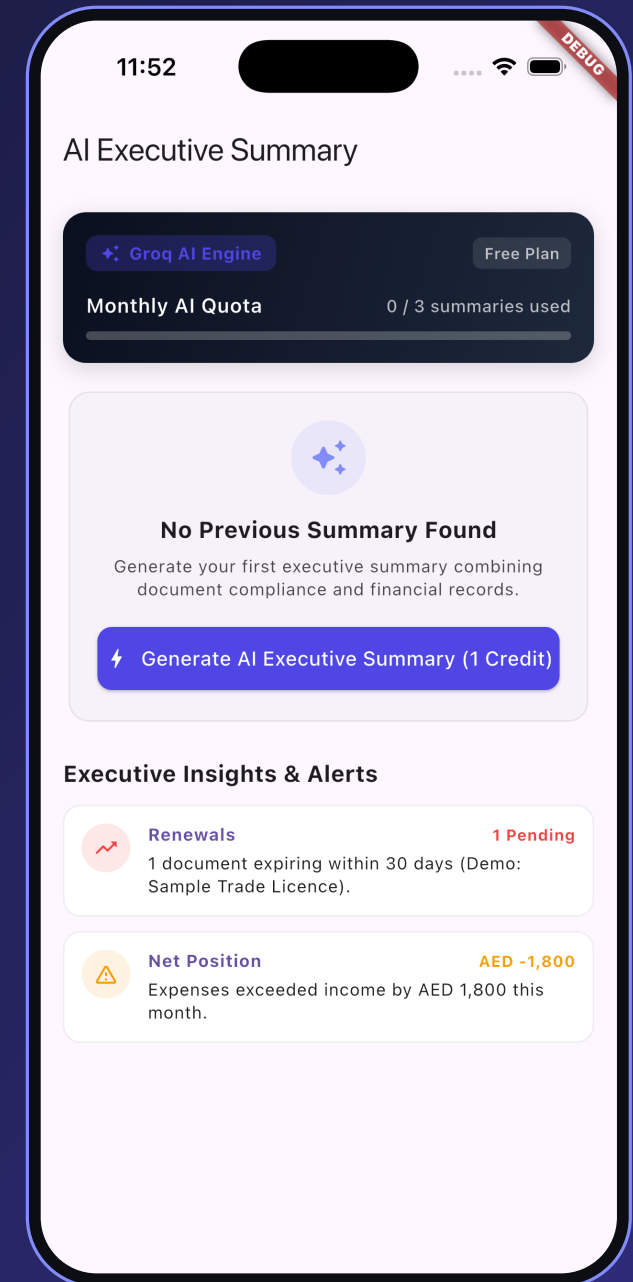

LIVE SCREEN - AI

An executive summary, generated for you

FV reads your month - spending, budgets, upcoming renewals - and writes the executive brief: what changed, what is coming, what to decide.

- AI budget planner turns "I want to buy X" into a savings plan.
- Smart templates work out of the box; bring your own key for more.
- One-tap expense and income logging from natural language.

Be our first user.

Every screen in this deck is the live app running with demo data - not mockups. Here is how it ships:

Free

AED 0

Core document tracking, one workspace, manual money logging, renewal alerts. Everything a single company needs to start.

Plus

monthly

AI summaries, budget plans, multi-year history, advanced forecasts and priority support.

Business

per seat

Multi-company workspaces, team access, exports and reporting for accountants and PRO teams.

FV

Founding-user offer: onboarding, data import help and a direct line to the builder. Your feedback shapes the roadmap - and you keep it for free.
